New Species ← can result in — Change Over Time

Natural Selection

Survival of the Fittest

also known as the

occurs through the process of

means

EVOLUTION — established by → Darwin

can also occur through → artificial selection

such as

Dog Breeds

who was a

Naturalist

who traveled to the

Galapagos

and observed

Finches

Turtles

with different

beaks

with different

Shaped Shells

which is supported by

Anatomical Evidence

fossil evidence

molecular evidence

such as

DNA

such as

Whale Bones

such as

Vestigial Structures

Homologous Structures

like the

legs on a skink

like the

forelimbs of bats and whales
