PROFESSIONAL EXPERIENCE

SOFTWARE PROGRAMMER, ADVANCED AUDIT SYSTEMS, INC., Moore, OK   8/2000 to Present

National company specializing in the development of auditing software for the insurance industry

Design specialized features encompassing time management, employee, and territory tracking for client server applications. Develop customized client reports with PowerBuilder, T-SQL and SQL server. Troubleshoot, debug, and resolve errors for eight software and five Web applications via SQL Server, PowerBuilder, Visual Basic, MS Visual Studio, ASP, and HTML. Produce, maintain, and enhance data import and Web applications. Perform pre-release quality control checks of all software programs. Create help files online and within applications.

Key accomplishments:

- Created database and online registration process incorporating user IDs, passwords, profiles, and privately accessible online data using ASP, HTML, VisualBasic, and SQL Server.

PROFESSIONAL EXPERIENCE
CONTINUED

- Designed current company logo / product theme adopted by company across all marketing materials.
- Developed 11 Computer Based Training programs using Macromedia's Authorware, maximizing end-user experience through overall architecture creation (display, graphics, sound effects, music).
- Created secure (password protected) Websites for use by potential customers; sites incorporated the ability to track usage by user ID.
- Selected to serve as project lead for the creation of Websites, CBTs, and client server applications.
- Significantly improved customer service, reducing database response time by 20% to 40%.
- Built PowerBuilder application used by insurance companies for mail audits.
- Implemented Web-Based Voluntary Mail Audit application, automating physical mail audit process.
- Recommended a more efficient client solution saving company 200+ billable programming hours.

NETWORK / HARDWARE SPECIALIST, RUNDLE COMPUTER SYSTEMS, Moore, OK   1/1998 to 8/2000

Provider of network solutions and custom-built computer

Provided network installation and troubleshooting support. Created and maintained Web pages using FrontPage 2000. Built custom computers and components from ground-up. Designed information retrieval forms for Teleform Elite (Version 6) and redesigned / maintained Crystal Reports from within VisualBasic for statistical data. Resolved problems, programmed functions, created system backups, and installed new features and components related to ACS phone system. Supported phone messaging for ActiveVoice Repartee 7.2 and TeLANophy system software.

Key accomplishments:

- Updated and modernized company's Website using various HTML tags and Java applets.
- Improved quality and bottom-line by recommending superior / cost-effective system components.
