

Rototuff™ RT705UV**** General Colour Chart

Printing Instructions & Read Me Tip - PLEASE NOTE: IT IS ADVISED THAT THIS COLOUR CHART ONLY BE PRINTED IN COMBINATION WITH THE ACTUAL MOULDED SWATCHES.

While all of these colours have been carefully matched to PMS and cmyk break-downs, some just cannot match exactly. In particular, if the chart is printed with the slightest magenta bias, this will very harshly affect all colours, being mostly made up of small % changes of cmyk.

Vibrant colours for rotomoulded products. Based on more than 9 years industry experience, Micropellets are passionate about providing well designed products to rotational moulders in Asia Pacific. The Rototuff™ RT705UV base resin and the addition of colours comply with the Australian Standard for Plastic Materials for Food Contact Use, AS 2070-1999.

General Colours provide excellent:

- Heat Stability
- Light Fastness
- Weatherability
- Colour Stability
