

Make Your Own Mini Umbrellas

Supplies

- Pencil
- Scissors
- Decorative paper
- Toothpicks
- Craft glue

Instructions:

1. If you plan to use your own decorative paper, start by cutting out a blank template. Otherwise, cut out one of our pre-made designs and skip to step 5.
2. Lay it atop the back of your choice of decorative paper.
3. Trace the shape of the template.
4. Cut out the shape.
5. As indicated on the template, glue the end with the flap to the opposing end, creating the shape of your umbrella.
6. Add a dab of craft glue to the tip of a toothpick and set your umbrella on top.
7. Once the glue has dried, your adorable mini umbrella is ready to be used as you wish. Place it in a cupcake, cake, drink or sand scene. Make a few dozen, and push them into a foam core wreath!
