Re: Operating Instructions for Fueling at Fleet Star LNG/LCNG Stations

The following instructions should help you to quickly and easily fuel your LNG/LCNG/CNG vehicle at any Fleet Star station. Please note that if you should lose these instructions, others have been provided on each side of the fuel dispenser. *If you have any difficulty at the station, call us at **(909) 827-9944** for help*

- STEP 1: Before leaving your vehicle, note your vehicle's odometer reading (you do not need the tenths of a mile number).
- STEP 2: Remove the nozzle from the side of the pump; make sure you have securely connected the fueling nozzle to your vehicle. Make sure you have turned the valve on the nozzle to the "FILL" position.
- STEP 3: Note the number of the pump in which your vehicle is connected. DO NOT TURN THE BIG HANDLE ON THE SIDE OF THE PUMP!
- STEP 4: Walk to the cardreader, follow the appropriate instructions below depending on the type of cardreader at the station.
 - AutoGas: Insert your Fleet Star Card into the slot with the card face up and the top edge of the card on your left; there is a small diagram just below the left end of the slot. Push the card in all the way to the back before quickly pulling it out.
 - Gasboy: Hold your Fleet Star Card right side up with the card facing towards you. Quickly slide your FleetStar card through the slot from right to left.
- STEP 5: Watch the card reader display; it will prompt you to enter certain information. If prompted, type in your four digit PIN number, push the "ENTER" button; type in your odometer reading, push the "ENTER" button; type in the number of the pump you are using, push the "ENTER" button, and if prompted type in any other information as requested. In all cases you must push the "ENTER" button after completing a response. The display will tell you when your purchase is approved.
- STEP 6: TURN THE BIG HANDLE ON THE SIDE OF THE PUMP TO THE ON POSITION. The "ON" position is the down position. After a short pause the gas will begin to flow into your tank.
- STEP 7: When the display indicates that the gas flow has stopped, turn the large handle on the side of the pump to the "OFF" position (up).
- STEP 8: Disconnect the nozzle from your vehicle, return it to the holder on the pump.

THANK YOU FOR FUELING AT FLEETSTAR!
