

# Make a clock

looking at o'clock

Children at school will practise telling the time on the hour (o'clock) using both analog and digital clocks. Cut out the clock face and clock hands. Use a split pin to attach the clock hands onto the clock face. Move the clock hands to make the times stated on the cards on pages 2 and 3.

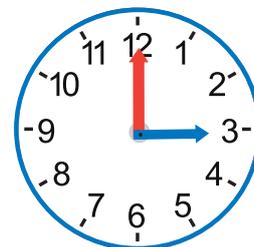

## Analog time

Cut out these o'clock time cards and use them to make the correct time on the clock on page 1.

To make the clock say **o'clock** the long **red** clock hand has to point to the **12** at the top. The short **blue** clock hand points to the **hour**.

12 o'clock

# Digital time

Cut out these digital o'clock time cards and use them to make the correct time on the clock on page 1.

To make the clock say **o'clock** the long **red** clock hand has to point to the **12** at the top. The short **blue** clock hand points to the **hour**.
