

## FIELD TRIP REPORT FORMAT

1. Give the report a TITLE that describes the theme of the field trip.
2. The report should have an Introduction at the beginning and a Conclusion or Summary at the end to provide organizational structure.
3. The body of the report should focus on three things:
  - Accurate descriptions of what you observed on the trip, in your own words (be specific).
  - Clear explanations of the scientific concepts and principles illustrated by what you observed.
  - An explanation of what you found scientifically valuable and informative about the trip, in your own words.
4. Length: About 350 - 500 words will be appropriate, although I am far more interested in clarity of writing and accuracy of concepts than in length *per se*
5. EACH LAB IS DUE THE FOLLOWING WEEK
