

LETTER OF RECOMMENDATION

To Whom It May Concern,

Paul Szypula was a Senior Designer at DNA studio during my employment there from September 2002 through January 2004. His responsibilities included Flash development, technical and art direction, animation, and design, working both on interactive and print products. In addition, Paul served as an engine of motivation, inspiring his co-workers to reach new levels in their work.

While at DNA I had the pleasure to work with Paul on many occasions, and he was always my number one choice team member as we shared a drive for graphical perfection. Together, we were responsible for delivering products to clients, such as Bacardi, Universal Studios, Budweiser, and Sprite, that would bring DNA prestige.

Paul is considered a top of the line media artist in the new media field. He proved his competency on a daily basis to his team members, particularly in the development of the "Modern Evolution of the Hulk" site (www.bubblebathgirl.com/projects/modern_evo/). As lead artist of this production I worked closely with Paul, constantly seeking his professional advice concerning issues such as optimization, functionality, user friendliness and how general graphic design should be approached.

I am glad to have had the opportunity to grow as an artist together with Paul and I strongly recommend him to any employer.

Sincerely,

Jens M Karlsson
Senior Designer
DNA Studio
