

## Workday Payroll for the United States

Workday Payroll for the U.S. addresses the full spectrum of enterprise payroll needs. It offers the control, flexibility, and insight you need to support your unique organization.

### Unified with Workday HCM

Workday Payroll was designed as part of Workday Human Capital Management (HCM). A unified payroll and HCM solution helps you maximize your overall investment in Workday.

- Take advantage of Workday's core system-of-record for worker data across HCM and payroll to manage changes for benefits, terminations, and life events.
- Give employees the ability to request time off, view payslips, and make payment elections from a unified self-service application that works on both a browser and mobile device.

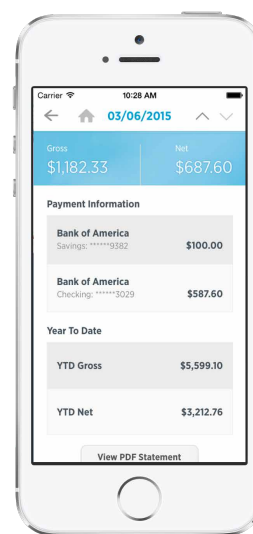

### Flexibility to Address Unique Requirements

Traditional payroll applications provide hard-coded, out-of-the-box packages that are often unable to accommodate specific business needs. Workday's flexible and intuitive configuration supports your organization's advanced requirements.

Workday's payroll partner program helps reduce the costs associated with deploying, integrating, and managing third-party payroll solutions.

To make integrations easier, Workday offers pre-built integrations to partners through Cloud Connect for Third-Party Payroll. Workday-certified partners build, offer, and maintain bi-directional integration, allowing payroll results to be displayed in Workday. Customers benefit by gaining a global view of payroll actuals from Workday, while still being able to use local payroll providers in each country that offer their desired level of service.

**“We realized that what we would gain from Workday, like predictive analytics and reporting, would be optimized if we had Workday Payroll. The things we were selling to the company as huge steps forward demanded that we have the best payroll system, which was Workday Payroll.”**
