## Products (Feature Reached cutting-edge innovative Solutions)

- **Claim Management.**

The Medex Management System [MMS] presents a comprehensive, fully integrated healthcare claim management system that caters all the industry's requirements. It presents a scalable, dynamic and flexible approach to accommodate the rapid growth and constant changes in the parameters of healthcare insurance services. It has been designed according to the highest international standards and codes in the healthcare insurance sector. Position itself as one of the most claim management software solutions available today. **The solution is fully implemented for one of the largest TPA Company in the Middle East (Medexa).**

- **Hospital Management.**

The Hospital Management System [HMS] is powerful turnkey management solution that allows hospitals to setup and operate in and out patient healthcare processing and management. HMS is fully customizable with amazing capabilities. Position itself as one of the unique comprehensive and cost-effective hospital management software solutions available today.

- **Insurance Supervisory Commission Automation.**

The Insurance supervisory commission automation solution is a unique business automation solution tailored to automate the supervisory end-to-end business process, which allows managing complete business workflow; collects all information and load it electronically and perform monitoring of the activities and performance.

- **Online Claim Approval.**

The online claim approval is designed to automate and generate the claim approval process to quickly and instantly generate the response through validating the submitted claim information against the insurance policy rules and conditions.

- **Pricing Simulation System**

The pricing simulation system is unique and state-of-the-art automated system tailored to facilitate and help insurance companies and sector in defining competitive and comprehensive burning costs, by using pre-existing data which can be loaded from any other system to simulate and identify the actual insurance costs, and then the system allows to simulate these information for any region and country based on specific user's factors.

### **Insurance Mechanism System**

The IMS lies between three parties (Insurance Company, Third Party Administrators (TPAs), and Insured Groups) that collects different data electronically, and performs data assembly, formatting and processing to support the insurance company in timely, accurate, and cost effective manners, which sustain up-to-time statistical information, and automats the manual process performed by the insurance company in collecting and processing the data from different parties.

## Products Integration [\(Relay on Technology\)](#)

Our Products are using and/or can have different integrated modules and/or systems that support and provide extra layers and/or interfaces to them such as **voice activated system** and **smart card** techniques.

### **Voice Activated System [VAS]**

VAS is system that facilitates the claim data entry by allowing the medical provider to check and enter patient contract and medical treatment information online. Using the Telephony lines linked directly to the database through a secure connection.

### **Smart Card Readers & Techniques**

Implementing the smart card techniques will facilitates the information services and validation and assures the up-to-date instant checking, validating and services and digitally identifies the rights for each party.

### **Online Claim Management**

When it comes to vital loss and claim data, every minute counts. The online claim management integrated to our solutions provides immediate and secured online access to policy and claims files, and much more. The online claim management allows on-the-spot access to all of required data, right up to claims repository. Also it provides self-directed, validation and approval capabilities and contacts to medical support team members.
