

## Business Architect

**Fulltime position** - Preferred location Amsterdam, applications from other countries are welcome

Atradius is looking for a Business Architect at the Project and Process Unit.

## Our organization

Atradius provides trade credit insurance, surety and collections services worldwide through a strategic presence in 50 countries. Atradius has access to credit information on 200 million companies worldwide. Its credit insurance, bonding and collections products help protect companies throughout the world from payment risks associated with selling products and services on trade credit.

The Process Excellence Pillar within the Process and Project Unit is the enabler for the transformation of Atradius into a process driven company. The unit is focused on deliver quality services to customers in a lean and efficient manner.

## Job Description

- Be part of the team responsible for the successful delivery of the new process and application architecture of the company. Support here with expertise in transformation initiatives.
- End-to-End Business Process analysis and Requirement gathering on enterprise level
- Design Future Processes based on KPI's and lean principals but as well looking for short/mid-term improvements
- Drive improvements based on clear measurements
- Propose changes and improvements with a clear vision about the results to achieve
- Implement those changes and demonstrate results
- Conduct Proof of Concepts, write option papers and advice senior management on right choices regarding process and technology investments based on risk analysis
- Promotion, training and enhancement of the Atradius Business Process Practice
- Maintenance of the Business Process Documentation
- Act as bridge between business and IT

## Knowledge, Skills and Experience

- University degree (above-average result) or comparable education or job experience
- Deep understanding of Business Architecture focussing on Processes, preferable from the insurance / finance industry. Credit insurance business process knowledge could be consider as a plus.
- Proven experience in Business Process Engineering and underlying methods
- Expert in Requirement Management
- Proven experiences in transformation projects
- Modelling expertise (BPMN, UML) with state of the art modelling tools like Sparx Enterprise Architect, ARIS, Mega or others
- Ideally experiences with Business Process Suite like Oracle Fusion Middleware SOA / BPM, Camunda, or others
- Sound understanding of Architecture-, Project Management-, Analysis Frameworks
- Quick thinker, decision maker and results oriented
- Capable to work within a multidisciplinary and multinational environment, together with internal and external team members
- Experience in delivery results at highest management level

- Willingness to travel
- Fluent in English (verbal and written)

**We are looking for someone who**

- Is methodical and process oriented and enjoys working in a, challenging, dynamic, international and demanding environment
- Is highly analytical, connectional and has good organisational skills
- Has well developed and diplomatic communication skills, presenting effectively and persuasively at all levels
