- Work closely with the Team Leader, Business Analyst and Product Owner for understanding the functional and system requirements.
- Work closely with the Architecture Team to ensure architectural integrity and product quality.
- Participate in testing process through unit testing and bug fixes.

Other Tasks

- Participate in daily scrum meetings
- Participate in sprint planning
- Work closely with the QA team, Product Management team, and the Research and Development manager to ensure quality and punctual software development within his/her responsibilities.

Qualifications

Required

- University degree in Computer Science or equivalent.
- Very good Java development skills.
- Good understanding of J2EE application architecture
- Experience in Java web presentation tier software development (Servlet, html, css)
- Good understanding of relational databases (MySQL, MSSQL)
- Reasonable understanding of Swing

Nice to have

- Experience in J2EE application server software development (EJB, JMS, JTA)
- Experience with JBoss Application Server
- Experience with Flex
- Experience with Netbeans platform

- Understanding of Hibernate framework
- Bilingualism (French / English) is an asset

Interpersonal skills

- Self-motivated, team player, action-and-results oriented
- Well organized, good communication and reporting skills
- Ability to successfully work under tight project deadlines

Organizational “Fit” Considerations

Interfacing Technologies is seeking a team player who enjoys technical challenges within a fast-paced environment, applies sound judgment in successful task planning and execution, meets deadlines, and communicates the highest standards of professionalism in his/her appearance and work habits.

If you have the interest in professional growth and joining a leading Canadian Software and Services company, it is time to consider joining Interfacing Technologies Corporation!
