

## RESUME WRITING GUIDE: *Objective Statements*

*Objective* statements can be very useful for college students and recent alumni who do not yet have enough work experience to write a *Profile* or *Qualifications Summary*. They are optional, but when well written can be used to summarize the position you seek (for example internship or entry level position), the value you might add to the organization, a particular skill you might offer, and/or your eagerness to contribute.

Do NOT write about what you wish to get out of the experience; focus on what you can contribute.

### Making the Most of the Space “Above the Fold”

Imagine your resume folded in thirds; the top third is considered the most valuable “real estate” on your resume because it is the first thing a reader will see. You may use this space for an Objective, but you may prefer a Qualifications Summary, or a Profile. Any of these can be used to communicate to the reader what type of position you seek and the value you may be able to add to their organization.
