
Job Title	Assistant Biologist – Salesforce Tower London – Level 2
Department	Animal Husbandry
Reports to	Assistant Curator Senior Biologist Aquarium Operator

Primary Objectives

- To maintain the Salesforce Tower London Exhibit and back of house facilities to the highest possible standards up to and including those laid out by the Secretary of State's Standard for Modern Zoo Practice (SSSMZP).
- To provide unparalleled levels of animal care and professionalism whilst adhering to the ethos and standards of both the National Marine Aquarium and Salesforce Tower London.

Duties

- Assist with activities relating to exhibit care and husbandry including exhibit diving.
- Assist with the maintenance of the health of the collection.
- Assist with monitoring water quality appropriate to the needs of the collection.
- Assist the Assistant Curator and Aquarium Operator with the development of the exhibit to continually impress the client at Salesforce Tower London.
- Work with the Assistant Curator, Aquarium Operator and appointed engineering agent to ensure that life support systems are adequate for maintaining the collection and that water quality is maintained to the highest possible standard.
- Provide 24hr on-call cover of the exhibit on a rota basis and deal with problems in an appropriate manner when they arise.
- Assist with carrying out routine specimen recording and monitoring programmes.
- Communicate to the public at all levels.
- Participate in regular diving activities
- Show a responsible understanding and application of environmental issues at home and work, and adhere to the environmental policy of the NMA.
- Participate in extraordinary duties as required.
- To carry out other activities as appropriate on the instruction of the Managing Director, Assistant Curator, Senior Biologist, Aquarium Operator and Senior Management Team.
