# JOB DESCRIPTION

**TITLE:** **WELDING SUPERVISOR**

**REPORTING TO:** **Operations Manager**

**BASED:** **Swanley, Kent**

**JOB OVERVIEW:** To oversee the running of our production cell responsible for the fabrication of level instrumentation. It will be a hands on role performing a variety of welding functions with the main focus being on the TIG welding of stainless, carbon steel & exotic pipe & flanges (1/2" to 4" NB) according to ASME IX which can be subjected to Radiograph of finished welds.

**MAIN DUTIES:**

- Maintain quality, health and safety within the production cell.
- Ensure high levels of fabrication and welding to appropriate ASME standards.
- Review practices and develop ideas to reduce manufacturing lead times & costs.
- Be able to understand & input into the creation of existing & new weld procedures & approvals.
- Schedule production within the team to ensure on time delivery.
- Provide guidance on material preparation including the cutting & machining of raw materials.
- 
- Fabrication & Welding of product according to specification & drawing(s) to a quality that ensures acceptance of radiographic weld examination & tolerances of +/- 1.5mm.
