

Behavior Frequency Chart

Student: _____ Start/End time of observation: _____
 Class: _____ Observer: _____

Directions: This chart is a quick way for classroom teachers to collect data on the frequency with which a student displays a particular behavior. Most appropriate to use frequency data when the goal is to increase or decrease occurrences of behavior.

1. Choose an observational period in which the target behavior is likely to occur. Use this same observational period each day. A minimum of 5 days of charting should be completed prior to any intervention is implemented in order to establish baseline data.
2. To record data: Work upward from the bottom of the column each day. Mark each time the Target behavior occurs during the observation period.
3. To Graph: Connect the highest number marked across columns to graph progress.

Target Behavior : What does it look like? (one behavior per page):

DATE															
FREQUENCY OF TARGET BEHAVIOR	26	26	26	26	26	26	26	26	26	26	26	26	26	26	26
	25	25	25	25	25	25	25	25	25	25	25	25	25	25	25
	24	24	24	24	24	24	24	24	24	24	24	24	24	24	24
