

UX/UI Designer & Front-End Developer

Indiepay LLC - Midtown, New York, NY

Job Description

Indiepay is seeking a talented web designer (UX & UI) with front-end development skills to join our growing software development team located in Midtown, NYC.

This is a rare opportunity to play a leading role in designing and developing the appearance and usability of a flagship product. The application is an ASP.NET single page application (SPA) utilizing LESS, Bootstrap 3, Kendo UI, and Kendo MVVM, RESTful end points, and SignalR. This position will involve researching what other similar applications are doing, translating the application's features to market-leading user interface usability, creating wireframes and graphical concepts, and contributing to the front-end development effort.

Skills & Requirements

- User Flow Diagrams / UI Storyboards
- Site Maps
- Wireframes (Axure)
- Web graphic design (Illustrator, Photoshop, etc.)
- Persona definitions
- CSS3 / LESS / Bootstrap
- HTML5
- JavaScript / jQuery
- Activity Diagrams
- UX/UI research
- Experience with MVVM SPA frameworks (AngularJS, Durandal, Ember, etc.)

About Indiepay LLC

Indiepay is the most reliable full service provider of payroll and financial services for film and TV media productions. For more than 10 years, we've helped Production Executives, Line Producers, and Production Accountants with payroll, accounting, and tax compliance solutions.
