Parent authorization forms

Components of an Individualized Health Care Plan

Who should have an Individualized Health Care Plan (IHCP)?

Students with mild to severe health care needs and require frequent nursing services at school should have an IHCP.

What is the purpose of an IHCP?

The IHCP helps assure consistent, safe health care for the student, protects the school nurse in legal proceedings, and provides documentation regarding the extent of services provided. Each IHCP should be individualized to meet the needs of the student.

What should the IHCP include?

The IHCP should include the following four components:

1. Nursing assessment
2. Nursing diagnoses
3. Nursing interventions
4. Expected outcomes

Each IHCP may include additional components to meet the needs of the student. The IHCP should be revised when the student's physical condition or care changes. Each IHCP should be consistent with minimum standards of care.

IHCPs also should address:

- Physical education classes, if appropriate
- Special activities (i.e., swimming)
- Field trips
- Classroom parties
- Off-campus work opportunities
- Bus transportation
- Medical equipment, supplies, and services

Who should develop and sign the IHCP?

The following individuals should help develop and then sign the IHCP:

- Parents
- Student
- Medical provider (optional)
- Registered school nurse

Parents or legal guardians **must** authorize, in writing, care provided for their minor children.

Medical providers (physicians, nurse practitioners, physician assistants) **must** provide written orders for medical treatments provided at school.

How often should the IHCP be updated?

The IHCP should be updated as appropriate and revised at least annually (i.e., at least once each school year) or after significant changes occur in the student's health status.

What is the Emergency Care Plan?

The Emergency Care Plan (ECP) is required when a chronic condition has the potential to result in a medical emergency. The ECP is a component of the IHCP.

National Association of School Nurses. (1998, Revised 2003). *Position Statement: Individualized Health Care Plans.*

Components of an Individualized Health Care Plan (IHCP)

1. Assessment

The assessment provides the background information for the IHCP and includes:

- Health history
- Current health status
- Self-care skills/needs
- Psychosocial status
- Health issues related to learning

2. Nursing Diagnosis

A nursing diagnosis summarizes the current health status of the student based on the student's response to the health condition and defines what the school nurse can contribute as an autonomous practitioner.

3. Goals

Goals are clear, concise, realistic descriptions of desired outcomes. They may be short-term or long-term but they must be measurable.

4. Nursing Interventions

A nursing intervention is any treatment performed to reach a goal or desired outcome.

5. Student Outcome

An outcome describes what the student is expected to do. It must be realistic and measurable.

6. Evaluation

The evaluation consists of periodically reviewing the student's goals and outcomes; comparing actual versus predicted outcomes; reviewing the interventions; and, if necessary, modifying the IHCP. Evaluations also should occur when the student's health status changes significantly or when the medical provider changes the student's prescribed treatment or medications.

Individualized Health Care Plan (IHCP)

Student: _____
Name Date of Birth

Prepared By: _____
School Nurse Date

Approved By: _____
