Ref: Sub-standard Food

Dear Mr. Jain,

I visited with my family to your Saffron restaurant on 16th January to celebrate my son's birthday. Unfortunately, the low-standard food quality in your restaurant really watered down our spirits.

The dinner started off in a very disappointing way when we were served some tasteless cold fluid which was passed off as Sweet-corn soup. The starters we ordered were rather oil-dripping, though we had clearly ordered for fat-free food.

The Main Course tasted equally bad. Though we had ordered an assortment of vegetarian as well as non-vegetarian snacks, and take our word on that, they all seemed to taste the same.

The only plus side was the well-mannered Service that evening and the friendly way in which your waiters patiently heard our numerous complaints.

I hope in future the quality of your food is able to match up to the quality of your service.

Yours faithfully,

Emily Swan
