1] DOMAIN NAME REGISTRATION & WEBSITE HOSTING

Domain Name Registration: Domain registration requires utilizing the services of a domain name registrar, an ICANN or national ccTLD accredited company that has the authority to register domain names. We help individuals and organizations to register a domain name that has an extension like .com, .org, .net, .info, .biz, .us, .mobi, .name, .pro, .tv, etc. depending on your choice.

Website Hosting: To make your Web site visible to the world, it has to be hosted on a Web server. We use the best architecture & web server technology to host all of our developed websites. Our hosting provider is larger than the next 8 closest competitors combined.

We will register a domain name for you, setup the server needed to host your Company site & create the initial website specific email you wish for your company (example: you@yourdomain.com). All theses services are renewable on a yearly basis. We will inform you one month prior to expiry date of domain and hosting.

Here are some technical details about the hosting server we use, Linux CentOS 64-bit, 120 GB storage, 4 TB/month bandwidth, 99.9% uptime guarantee on network, Server Software – Apache, Database Server – MySQL Database, Server Side Scripts – PHP, CGI, PERL, Python.
