

Electrical Project List

Project List for ELECTRICAL Engineering

1. Solar irrigation system
2. Solar powered tree leaf cutting machine
3. Thermal power plant using solar energy
4. Electricity generation unit using steam energy
5. Electromagnetic punching machine
6. Electrical super changing of IC engine
7. Automatic electric power steering
8. Variable speed electric hack saw
9. Spark plug testing machine
10. Electric car jack
11. Wind power generation system using railway
12. Electromagnetic braking vehicle
13. Economical anti theft system for two-wheeler
14. Micro hydro electrical turbine
15. Electromagnetic embossing machine
16. Electromagnetic mixture separator conveyer belt
17. Electromagnetic shearing machine
18. Electromagnetic ramming machine
19. Electrically operated portable rammer
20. Battery operated motorized portable crane
21. Night light system for bullock cart using self power
22. Air suspended wind mills
23. Self power generating buildings
24. Vertical axis wind mill
25. Wind energy turbine for railways
26. Solar powered portable exhaust fan for cars
27. Solar powered automatic railway gate
28. Solar irrigation system
29. Wind mill for water lifting and electricity generation
30. Solar operated portable sprayer for nursery
31. Hydro electricity generation unit
32. Footstep electricity generation unit
33. Electricity generator unit using speed breaker
34. Manually powered flywheel based battery charger
35. Electrically operated hammer
36. Model of tidal energy turbine
37. Solar operated spray pump
38. Solar operated duster
39. Flywheel based battery charger
40. Demonstrative model of wind energy turbine
41. Model demonstrating wind mill as supplementary power source for electric vehicles
42. Solar inverter
43. Swing electricity generation unit
44. Solar chimney for electricity generation effect
45. Electric two wheeler

46. System ensuring seat belt application
47. Advance antitheft system for two wheeler
48. Automatic electromagnetic shearing machine
49. Solar operated personal cooler
50. Solar operated winnowing machine
51. Solar operated tricycle
52. Solar powered automatic escalator
53. Transformer heat reduction system
54. Solar powered portable grinding machine
55. Electro-mechanically operated paper cup folding machine
56. Electric hack saw machine
57. Electricity generating exercising bicycle
58. See-saw electricity generation unit
59. Slider electricity generation unit
60. Merry go round electricity generation unit
61. Electricity generating footpath
62. Rotary gate electricity generator
63. Steam power plant
64. Solar powered thermal plant for electricity generation
65. Electric car jack
66. Motorized focus light mechanism for all directions
67. Solar laminator
68. Conceptual solar vehicle
69. Electricity generating staircase
70. Horizontal axis tidal energy turbine
71. Suspended water energy turbine for seas
72. Linear motor
73. Device for demonstration of magnetic levitation and launching

Salient features of our services includes.....

- Final Year Projects available for Diploma, BE, ME, MTECH, PhD
- Mini projects are available for 3rd Year BE.
- **Customized seminars are also available.**
- Projects available for **Computer, IT, Electronics, Electrical, Mechanical, production, automobile, Robotics**
- Explanation of the project work, guarantee of the completion of project*
- Accommodation for out station students on availability basis
- PROJECT can be shown/ delivered in the form of modules as per requirement*.
- Expertise knowledge, work experience and thereby satisfactory service since last 10 years.
- Mechanical / Electronics subassemblies kits available for Electronics/ Instrumentation/ Mechatronics/ Robotics projects
