# Size Chart

WHEN ALL EYES ARE ADORING YOU AND YOUR BRIDAL PARTY,

It's good to know we've taken the extra time to proportion your dresses, so a size six fits as glamorously as a sixteen. Here are a few things to keep in mind during fittings and alterations.

## HOW TO MEASURE YOUR WTOO DRESS

Stand comfortably, with equal weight on both feet and arms resting easily at sides, relax stomach muscles.

- 1 BUST/CHEST**  
Measure around the fullest part of the bust, keeping the tape measure parallel to the floor.
- 2 WAIST**  
Measure the natural waistline.
- 3 HIPS**  
Measure 8" below the waist to find the fullest hip. Measure around the hip, keeping the tape measure parallel to the floor.
- 4 SKIRT LENGTH**  
The skirt length is the distance from the waistline to the bottom of the skirt.

Above the knee lengths: 22" and 24" from waist  
Knee length: 28" from waist  
Cocktail length: 32" from waist  
Floor length: 44" from waist  
Extra length: Add 5" to floor length or 5" to the knee length (see product guide)

Note— these measurements are based on a standard size 6.

Please check with your retailer for individual style hem lengths and possible additional charges. These lengths apply to our bridal and bridesmaid gowns.

## HOW TO SELECT YOUR SIZE

We recommend your measurements be taken by a professional seamstress or tailor. Always measure over undergarments while wearing shoes at your committed heel height for more precise information. Please do not give bra or jean sizes. If you have a large cup size or broad back, the size of the garment may have to be adjusted accordingly.

If your measurements fall between two sizes, consider the largest measurements first, as well as the style you're ordering, then determine which measurements would be easier to alter. Remember, it's usually easier to take the garment in than to let it out when making alterations. And while it's always good to think positive, try not to overestimate the results of a healthy diet program.
