

# COMPANY PROFILE

ARGOS (Agri Projects) LTD

October 2012

## ARGOS (Agri Projects) LTD

**Argos (Agri Project) LTD** is an agricultural technology company which specializes in supplying full kit agricultural complexes & tailor-made projects.

A professional team with years of worldwide practical experience and record accompanies the projects from the concept stage, through the project's

realization to its full operation.

**Agriculture:** Cultivation of a wide-range of agricultural crops in different climatic conditions in greenhouses, open fields, plantations, orchards etc.

Implementation of the most innovative agro-technologies available in our projects

allows cultivating various crops throughout the year, planning the harvest time in accordance with local market conditions.

**Water Management:** innovative solutions for water storage and distribution, and state-of-the-art irrigation systems.

# Irrigation Systems

Benefiting from vast experience of over thirty years in everything related to irrigation, our customers can now enjoy innovative solutions and state-of-the-art products for agricultural irrigation systems.

Also in supply are various custom-made solutions, supplied as a ready for installation kit, for irrigation and fertigation in open fields, plantations, orchards, greenhouses and more. Additionally on offer are

various solutions for water and liquids storage, both collapsible and high-volume, customized in accordance with customer needs and requirements.

*In the last four years, AR Sprinklers were great success among potato growers in Israel*

- ✓ Greenhouse Irrigation & Fertigation Kits
- ✓ Large Scale Plantation & Open Field Cultivation Dripline Irrigation Kits
- ✓ Large Scale Plantation & Open Field Cultivation Sprinklers Irrigation Kits
- ✓ Collapsible & High Volume Storage Tanks from 5 to 700 m<sup>3</sup>

## Argos Sprinklers Line

In 2008 Argos launched a new line of high-quality sprinklers produced in accordance with Israeli standards and quality control. We strive to offer friendly prices to the customers, all the while assuring the high quality product with the strong QC protocol.

Our sprinklers are produced in compliance with the Standards Institution of Israel and were successfully introduced to the local market four years ago. After a great success among vegetable growers in Israel, today the sprinklers are sold in Europe, South America, Africa and other regions.

*Argos. Just grow.*

## Sample Project: Regional Socio-Economic Projects in Central America

A regional socio-economic greenhouse project with climate control and post-harvest systems, aimed for

vegetables marketing to the USA market, including project management and OJT. The project served as regional

logistics, technological and marketing center for local farmers.

## Sample Project: Regional Development Projects in Asia

An ongoing regional development project for orchard cultivation. The project includes innovative

plants nurseries, irrigation and fertigation systems and post-harvest systems. The regional development works

include water harvesting, agricultural development and training & classes by leading Israeli experts.
