BIOGRAPHY

My name is Mary Brown and I am starting my junior year in the New College of Interdisciplinary Arts and Sciences at ASU's West campus. I am majoring in Psychology with a minor in Biology. I am the first person to go to college and have really loved my experience at New College and ASU! I come from a large family and am the oldest of four children. I moved to Phoenix from Washington state to attend ASU. Although I am far from home, I feel I made a good choice attending New College because I've learned how to be independent and have more confidence in learning new things on my own.

Currently, I am in Psi-Chi honors society and volunteer at the Glendale local Boys and Girls club. I really enjoy learning about people and how the mind and body function. Last semester I helped organize a service event for the Boys and Girls club with my friends in the Psi-Chi organization. We taught the children about basic nutrition and the importance of exercise. I really enjoy volunteering with the Boys and Girls club because I feel that I can identify with most of the kids that attend the club. I want them to know they can go to college and make a difference in this world. I think sometimes, people just need exposure to new ideas or experiences to help them know what they want to do in life. I just got hired as a Peer Mentor, so I am excited to start that this fall! After I graduate, I hope to go on to graduate school in Washington, Arizona or California to combine my Psychology degree and minor to become a public health education advocate.
