

COMPANY PROFILE

About InCube

InCube FZCO (Branded as *InCube*) brings forward years of knowledge and experience and utilizes them to provide its clients with value-added benefits. Since established in 2004 by a group of young and enthusiastic team, the target was offering a unique and niche solutions with great added value. Today *InCube* is one of Middle East & North Africa premier Hardware & software solutions providers. With headquarters located in Jebel Ali, United Arab Emirates, and offices located in Jordan, Saudi Arabia, Iraq, Egypt, and Canada.

The company's core business areas include development of state-of-the-art handheld solutions with focus on Supply chain and tailor-made solutions.

InCube's consulting services help companies recognize the optimum opportunities for using advanced mobile technologies in streamlining their business processes and provides comprehensive training for the use of its solutions.

InCube delivers much more than just technology, *InCube's* objective is to fully understand its customers' business processes and to deliver significant added value to its customers by developing solutions that dramatically reduce their costs and enhance their ability to adapt to changes in their markets.

InCube's services and solutions are diversified. Merging them all brings forward a unique and valuable offering in business enhancement.

This covers aspects such as building the right processes, automating them and launching them into the international marketplace while using best practices and international standards as guidelines of quality.

In more ways than one, *InCube* is a one-stop-shop for a company's complete business needs.

In 20/9/2015 *InCube FZCo.* acquires ISO 9001:2008 quality management system certificate.

Vision And Mission

Vision

To become the leading edge technology provider in the Middle East and North Africa by creating high quality mobility products and services and partnering with the most renowned suppliers of Mobility solutions (S/W and H/W) in order to fulfill our clients' expectations and achieve measurable competitive advantage.

Mission

To become an indispensable partner to our clients by offering and managing the finest assortment of vendors and service providers in the field of Information Technology combined with localization, best practices and service excellence.

7

Today InCube is having Seven operational offices:

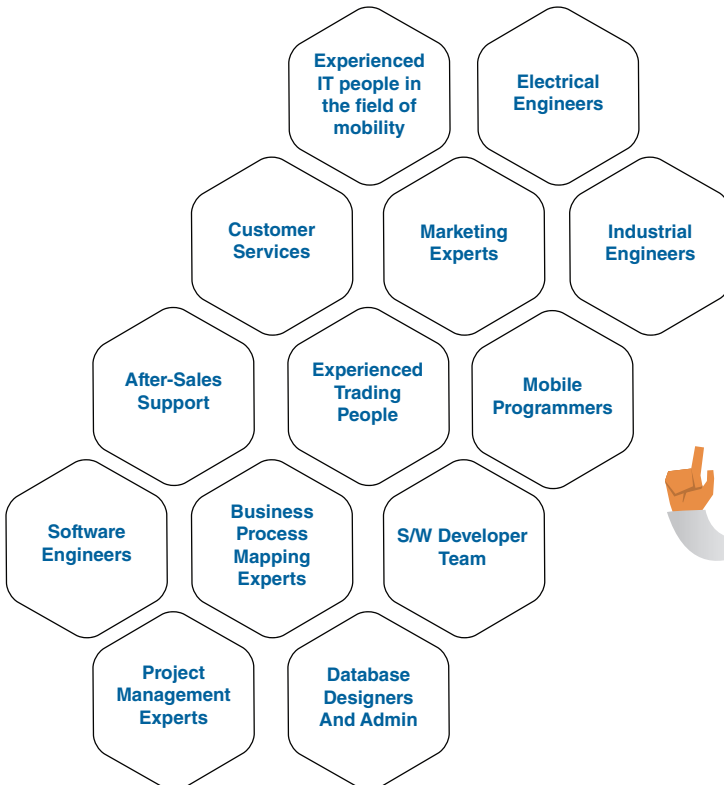

InCube Team

InCube's team consists of highly qualified consultants, computer Engineers, Hardware technical consultants, graphic designers, developers, and professional certified project managers. This team has helped companies in the mobility world to carry on their work successfully and establish trust with our brand. The people that make up *InCube* have years of experience working with some of the largest brands on the market today.

InCube team is one of the most homogeneous and professional. All of its members are working in harmony offering their utmost loyalty and dedications. *InCube* team have gone beyond products and technology and decided to offer the localization knowledge and technology as the added value of any product and/or service that *InCube* well sell.

InCube team experiences cover the following areas:

Key Business Achievements

InCube's reference list is long, combining those customers that are having full or part of *InCube* solutions, or combining *InCube* H/W with other solutions. Our Clients fall in different market verticals, such as but not limited to FMCG Companies, Couriers and Delivery, Retail, Utilities, Healthcare, Security companies, airports, airlines, Army, and Government (Inspection, Traffic department, municipalities ...)

Key Partners

One of *InCube's* major assets is the partnerships it boosts. Settling for nothing less than the best, *InCube's* partners are the leaders in IT systems and hardware and are an important factor in guaranteeing success. *InCube* acts as a regional office for many of these partners; covering pre-sales, market research, marketing services, localization efforts, after sales support and training among other services. *InCube's* partners and business associates represent various industries such as Wireless & Mobile Computing, and supply chain solutions in general.

Mobility & Supply Chain Solutions

Mobility is our specialty and as we grow in the business we try to include in our bouquet of mobility applications the most valuable and needed solutions in many different industries such as Distribution, Maintenance, Asset management and Warehousing. Being partners with multiple market leaders is also one of our strong points in the market.

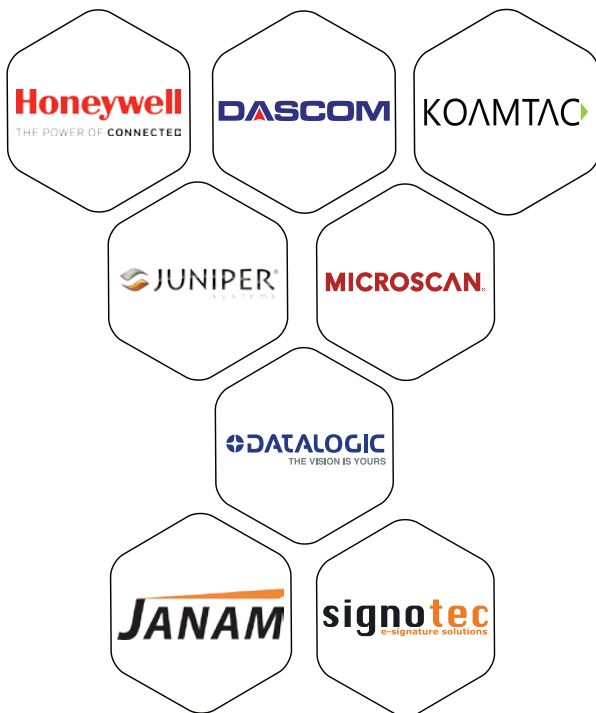

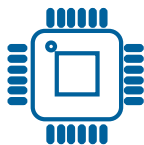

And since we work from a perspective that says: “Process is the Key”, we offer our clients the most possible hardware/software that suites their businesses and need for mobility using many advanced technologies and methodologies based on Supply Chain Council best practices and framework whenever applicable. And in all of our application we look at the process we optimize through will defined BPR methodologies and then we deliver our solutions.

InCube is a leading software development firm, specializing in the design, development and deployment of mobile and wireless software solutions. Combining comprehensive business process analysis and methodologies designed specifically for mobile initiatives.

InCube ensures that its clients will gain a significant return on their technology investment. Through its software solutions *InCube* has helped improve the productivity, efficiency and customer service offerings for companies in a variety of industries with field forces of numerous mobile users.

Hardware Product

InCube ensures that its clients will gain a significant return on their technology investment. Through its software solutions *InCube* has helped improve the productivity, efficiency and customer service offerings for companies in a variety of industries with field forces of numerous mobile users.

Honeywell Scanning & Mobility is a leading manufacturer of high-performance image- and laser-based data collection hardware, including rugged mobile computers and bar code scanners. **Honeywell** product portfolio is one of the broadest in the industry, providing customers with solutions for vertical markets such as retail; healthcare; manufacturing; warehousing; ports; and transportation and logistics. **Honeywell** offer the following product categories:

For more than three decades **Dascom** has been involved in business printing solutions, telecommunications, and advanced technology – serving some of the largest international clients in the world. With a global reach serving nearly 200 countries **Dascom** advanced solutions help businesses around the world or just around the corner maximize their office efficiency.

Dascom mission and philosophy has long been to be the world leader in serial printing technology. From barcodes, bills of lading, invoices, multi-part forms and a host of other critical documents, **Dascom** is the company that commerce calls on when seeking the best in in cost-effective total print solutions.

Industrial Range (Heavy Duty Printer)

Printers

DP-550

- Reliable label printing for mobile office, warehouse, and other non-stationary environments.
- Direct thermal printing at up to 3.3 inches per second.
- Shock absorbing elastomer overmolding for printer protection.
- Flexible mounting options.
- Popular printer emulations provide compatibility.
- Up to 3.3 ips

DP-520

- Simple to use ... single-hand, easy paper load system.
- Ultra-portable size with the smallest footprint - weighs only 450 grams with battery and media.
- Linerless label capability to reduce waste - more labels per roll.
- Variety of mounting options - belt clip, wall mount, cartmount, vehicle mount.
- Up to 2 inch/sec.

Dascom Business Printing Solutions

DP-530

- Up to 5 inch/sec.
- Popular printer emulations provide compatibility
- High-speed signature printing and extensive font and graphic capabilities.
- Simple drop-in paper loading.
- Easy-to-read control panel and simple drop-in paper loading.

DP-580

- Easy-to-read control interface and simple drop-in paper loading.
- IP54 rated for water and dust resistance.
- Dual tear bars allow easy tear-offs.
- True WYSIWYG printing with the Windows driver.
- Printer integration is quick and easy with Windows driver or AppleTM, AndroidTM, and Microsoft SDKs.
- Up to 2 inch/sec.

DP-540

- Easy-to-read control face and simple drop-in paper loading.
- IP54 rated for water and dust resistance.
- Printer install is quick and easy, and has one cable for power and data.
- Rugged, durable all-metal case.
- Up to 2,8 inch/sec.
- Auto ON and OFF with vehicle power.

MIP480

- Fastest impact mobile printer available today for truck use.
- Rugged construction.
- Simple to change ribbon.
- 12-24 volts nominal for compatibility with a wide range of trucks.
- Easy paper loading.
- 600 cps (Fastest Draft); 400 cps (Draft), 133 cps (LQ) at 10 cpi.

KOAMTAC's KDC Bluetooth barcode scanners are the world's most compact yet durable and dependable data collectors on the market today.

KOAMTAC's products are backed by a team of Class A engineers driven by innovation and excellence to maintain the company's leadership status in Bluetooth barcode scanning technology. Koamtac created a new market in the barcode world with an exciting new product with a quality and versatility that set it apart from the competition.

A product universally compatible with all technology platforms --PCs, Android, Blackberry KOAMTAC is the very first company to make Bluetooth barcode scanners compatible with Apple products, including the iPhone, iPod and iPad.

Barcode Scanners

KDC200

- Supports all major one dimensional barcodes.
- Superior scanning performance with the top of the line laser scan engine.
- Large data memory (Basic 160KB, Optional 4MB).
- Bluetooth V2.1+EDR, Class 2, HID/SPP/MFi.
- Bright OLED display.
- Powerful keyboard emulator with keyboard wedging, application generation, DB look up and inventory program.

KDC400

- Easy to change custom smartphone tablet/cases.
- Supports all major 1D and 2D barcodes.
- Supports triple track and Japan double side track.
- Bluetooth V2.1+EDR, Class 2, HID/SPP/MFi.
- Rechargeable 1200mAh Li-ion battery with Smartphone charging capability.
- Powerful keyboard emulator with keyboard wedging, application generation, DB look up and inventory program.

Founded in 1993, **Juniper Systems**, Inc. has become a world-leader in ultra-rugged handheld computers, Creating customer driven rugged field computing solutions.

Juniper Systems provides rugged handheld computers, geospatial solution tools, excellent customer service, and the ultra-rugged iSafe handheld that operates in explosion areas, which will fit two major verticals Oil and Gas , and Military.

Mobile Computer

Archer 2™

- Extra-large display for easy viewing.
- Capacitive touchscreen provides sharper image & durability.
- Hold-to-zoom™ gives you absolute precision.
- Bluetooth®, Wi-Fi®, cell modem, serial, & USB connectivity.
- Designed to MIL-STD-810G.
- Operates in extreme temperatures from -22F to 140F (-30C to 60C).

Mesa for Hazardous Locations

- 806 Mhz PXA320 Processor.
- Active viewing area: 5.7" (145 mm) color VGA LCD (640 x 480).
- Intelligent Li-Ion battery 7.4VDC @ 2550mAh, 18.9Whr.
- CE Marking (applicable EMC, R&TTE, and LVD directives).
- 256 MB RAM.
- Operating Temperature: -22F to 131F (-30C to 55C) with barcode scanner.

Squarell is specialized in CANbus and vehicle data signals and develops and produces products and solutions for CANbus and vehicle data processing. We have a vast experience in automotive applications and knowhow in interpretation of vehicle signals. Squarell portfolio is used in automotive, telematics, industrial and off-road.

Fleet Management Solutions

SOLID-J

- One solution for your entire fleet.
- Trucks, vans and cars.
- More data available than off the manufacturers' interfaces.
- Easy integration with telematics platforms and modems.
- Save fuel, drive better, reduce CO2 emission.
- Output in CANbus (FMS/J1939) or RS232 (ASCII).

Special Function Devices

Telematics Development Kit

- Make an on desk simulation for a driving truck.
- Make CANbus scans from vehicles.
- Replay CANbus scans in your on desk simulation.
- Load new software into the Squarell FLEX device.
- Install the FLEX in a truck connected to your telematics solution.

With experience exceeding 30 years in printing , *InCube* is offering the best printers that will fit its customers' needs making sure that the offer only the best quality with the best price.

Mobile Printer

Mobile Printer Dot Matrix

- Rugged construction.
- Easy paper loading.
- Simple to change long life ribbon.
- Can handle fan fold and cut sheet forms.
- Print speed up to 480 cps.
- Backlit control panel.
- Bluetooth and 802.11 b/g connectivity available.

Thermal Mobile Printers (N3T-2I)

- Easy loading paper.
- Faster printing speed up to 60mm/sec
- Long time Lithium-ion battery (7.4V 1300mAh).
- Magnetic Card Reader for option.
- Mobile printer with MSR could read kinds of stripe card.
- Mobile printer can work under many mobile equipments.
- Mobile printer can work outdoor.
- Small size, light weight, stable performance and easy using.
- Wide usage: mobile police system, logistic system, mobile office system etc.

Thermal Mobile Printers (N3T-3I)

- ARM-based system, high accuracy sensor, high integrated hardware designing.
- Encrypted firmware control.
- Accurate Fixed Length Printing.
- Automatic Detecting to Paper Styles.
- Printer Head Over-heating Protection ensures high stability and efficiency.
- Available of Application Software.
- Multi connection port: USB, RS-232, BLUETOOTH, wide usage.

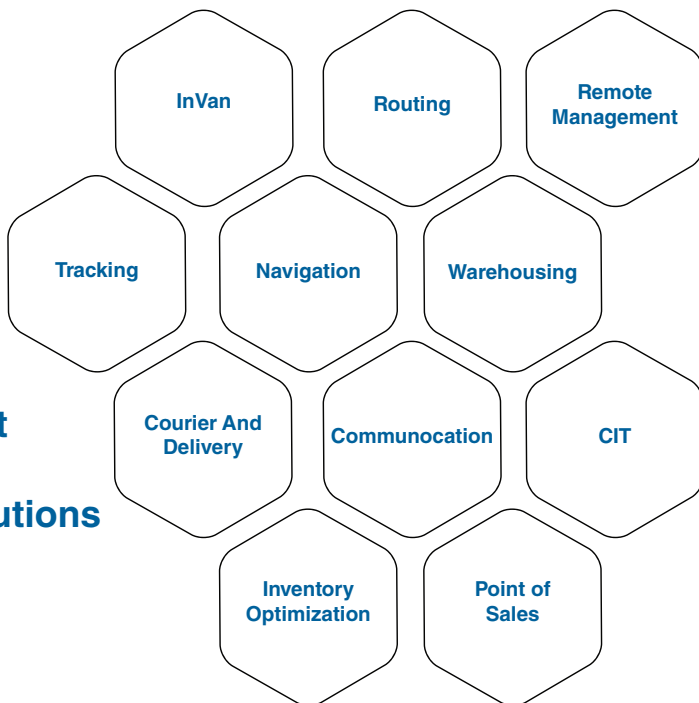

InCube is committed to your success with world-class Mobility Solutions. Whether you are a new client implementing an *InCube* solution for the first time or a present client requesting additional training to optimize your use of our solutions, you can be assured that you will receive a well-planned and well-executed approach toward meeting your goals and objectives.

Using mobile devices in our solutions shortens the service response time and increases the productivity of the on-field workers because information is delivered to the mobile workforce in real-time. This gives guaranteed ROI.

Our solutions consist of a combination of multiple systems/modules that are totally integrated together. All systems are based on modular scalable architecture where you can initially adopt the modules that best fits your more urgent needs and allocated budget, yet be able to adopt more modules in the future without losing your initial investment.

State of the Art Leading and integrated Solutions

InVan

IS THE SOLUTION

**WHO NEEDS
INVAN?**

Businesses which have distribution, ordering and merchandising including all FMCGs, industrial and petro chemicals etc.

THE FIELD OF SALES & DISTRIBUTION VS. THE PAIN

1. Employees take a long time to service customers in the market.
2. Limited customer service and satisfaction.
3. Lost opportunities.
4. Difficulty of sharing information with the field.
5. Expense costs for Mileage, Storage , Number of Operators.
6. Difficulty of Online Transactions.
7. Data clarity is a big challenge facing Integration between the field and ERP.

WHY INVAN NOT ANY OTHER COMPETITORS SOLUTIONS (USPs) UNIQUE SELLING POINTS

1. Dynamic customized solution.
2. Web based interactive customized dashboards.
3. Integrated with all main enterprise resources planning.
4. Open source reporting service.
5. Supports multi - level organization structure.
6. Supports multi data base (SQL and Oracle) and multi-language interface (Arabic, English, French and Persian).
7. Integrated with useful third party applications including (navigation, territory planer, WMS, AMS and remote HH management) which enhance information flow and sharing between different departments.

WHAT ARE THE MAIN FEATURE THAT INVAN HAS

- 1- Sales and Accounting.
- 2- Route Management.
- 3- Promotions and FOC.
- 4- Warehouse Management.
- 5- Inventory Control and Monitoring.
- 6- Order Management.
- 7- Tracking.
- 8- Mechanizing.
- 9- Targets and Achievement.
- 10- Forecasting and ROI.

WHAT ARE OUR IMPLEMENTATION STRATEGIES:

Our implementation strategies are always about:

1. Site and Process Analysis.
2. Project Management and Planning.
3. Resource Allocation and Planning.
4. Infrastructure Planning.
5. Integration with 3rd Party S/W providers (ERPs, etc..).
6. Implementation of Best Practice Methodologies.
7. Thorough on-site Testing before Go-Live.
8. Go-Live Support.
9. After-Sale Support.

WHAT ARE THE KEY FEATURES THAT INVAN HAS:

1. **Employee Accountability:** By tracking each individual sale within the company, InVan can give you a detailed breakdown about each employee performance, allows better visibility to the current activities happening on the road.
2. **Forecasting and Intelligence:** InVan allows business owners to make intelligent decisions about resource allocation and Stock distribution.
3. **Contact Management** by having a complete view of customers, including activity history, contacts details, customer financial details.
4. **Real Time Operations** and Dashboards.
5. **Customized Reporting** and KPIs.

WHO ARE THE MAIN KEY HOLDERS:

- 1- Company Top Executives.
- 2- Sales & Marketing Team.
- 3- Financial Control & management.
- 4- Logistics & Supply Chain.
- 5- Go-To-Market Strategists.
- 6- Sales Capability and Enablement.

MAIN FEATURES OF INCUBE INHELP:

- 1- Customers-Contracts Registration.
- 2- Preventive Maintenance Management.
- 3- Corrective Maintenance Management.
- 4- Service Request Management.
- 5- Tasks Scheduling/rescheduling and assigning.
- 6- Dynamic Inspection questionnaires.
- 7- Spare Parts Management.
- 8- Reporting Management.

INCUBE INHELP IS THE SOLUTION FOR :

Businesses that provide field service for customers whether this service is related to sold products, or not. It helps managing the field service workforce.

INCUBE INHELP UNIQUE SELLING POINTS:

- 1- Dynamic Customizable Solution.
- 2- Advanced reporting service.
- 3- Service request mobile app.
- 4- Supports multi - level organization structure.
- 5- Integrate-able with all main ERPs.
- 6- Integrated with useful third party applications including (Navigation, Territory planer, WMS, AMS and Remote HH management) which enhance information flow and sharing between different departments.

THE PAIN THAT IS FACING FIELD SERVICE PROVIDERS:

- 1- Workforce field service employees consume long time to serve customers.
- 2- Customers are not being served at the time expected.
- 3- Tasks management and assignment for the workforce is hard.
- 4- Customer service reports are not provided to customers.
- 5- Work scheduling and long term planning is hard.
- 6- Lost opportunities and customers.
- 7- Difficulty of sharing information with the workforce in the field.
- 8- Management lack of visibility.

KEY ADVANTAGES OF INCUBE INHELP:

1- Employee Accountability:

By tracking each individual tasks and assignments, the system can give you a detailed breakdown about each employee performance, allows better visibility to the current activities happening.

2- Customer service feedback:

The customer service app allows the customers to submit feedback on the services provides by the workforce.

3- Task Management:

Task management by having a complete view of all customer requests and planned services and having the ability to assign, schedule and reschedule.

4- Customized Reporting and KPIs.

MAIN STAKEHOLDERS AT THE CLIENT SIDE:

- 1- Top management.
- 2- Workforce supervisors.
- 3- Field workers.

SOFTWARE APPROACH:

- 1- We usually provide 6 months warranty for the software.
- 2- Any stoppage must be clarified with 1 working day.
- 3- Reported issues must be clarified and scheduled for resolution within 2-5 working Days.
- 4- Clients are requested to sign SW maintenance contract where all the above is clarified in details.

IMPLEMENTATION STRATEGIES :

- 1- Scoping and Gap analysis.
- 2- Project plan, Deliverables and Timelines.
- 3- Allocate necessary resources and teams.
- 4- Environment preparation (H/W and Network).
- 5- Integration with ERP (if part of scope).
- 6- Installation of software packages.
- 7- Training for administration.
- 8- Training for Super users.
- 9- Training for all users.
- 10- Pilot Run, UAT.
- 11- Launch live phase.
- 12- Provide maintenance and support as agreed in the contract.

EXTRA FEATURES OF INCUBE INHELP:

- 1- Tracking (based on devices).
- 2- Smartphone app for customer service requests.
- 3- Management Smart Phone Reporting.
- 4- Device Remote Management.

Warehouse Management

N3WMS will help you manage your inventory items and your warehouses in the way that best suits your business and your needs

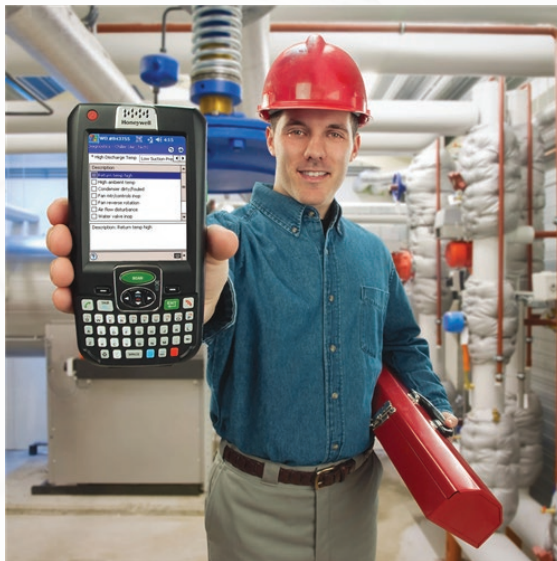

The market of WMS is quite mature and been around for decades, so it is quite a challenge to offer a Solution that extends from the point of storage to the point of use. Our customizable solution will give our clients real time information that can be used in a glance due to our technology that uses Bar-coding and Mobile hand-held devices. Our hardware & software solutions for warehouses are exactly what you are looking for in your warehouse. So if you want to be unique and to stand up to the challenges in the world of warehousing, take a look at what we can do for you.

Asset Management

N3AMS will help you manage your assets and their entire life cycle in the way that best suits your business and your needs

InCube's Asset Management System N3AMS is exactly what you need to manage the entire life-cycle of your assets from the point of Design/selection to the point of Disposal. We offer you the ability to follow up on your assets in terms of creation/identification, scheduling preventive/corrective maintenance, needed repairs, status tracking and finally disposing of assets. By managing & defining assets into Processes and Contracts all in real time operations, we lead your business to optimized productivity, efficiency and profitability.

Solution In a Cube

InCube state-of-the-art Solution in a Cube designed to help niche business needs with specially designed mobility products that suites various business needs

Solution In A Cube Advantages

- 1- Quick system implementation
- 2- Easy to use
- 3- Cover all needs for your organization
- 4- Advanced reporting
- 5- Shipped with a printer , a device & a user guide

Solution In a Cube

01 Emergency Vehicles Inspection & Fleet Management System

InCube's Emergency Vehicles Inspection & Fleet Management System is a solution designed to facilitate the management tasks of emergency vehicles. This includes inspection, maintenance, and replenishment of items.

Main Features:

1. Routine inspection.
2. Preventive maintenance.
3. Inventory control.
4. Products replenishment.
5. Reporting.

Optional Features:

1. Tracking (based on devices).
2. Smart Phone Reporting.
3. Automated Notifications.
4. Navigations.
5. Device Remote Management.

02 InTest InCube Driver's Test Automation System

InCube's Drivers' Test Automation System (InTest) is a solution that can be used by Drivers license issuing authority. InTest work on tablets /smart phones ,and specialized handheld devices, which enables all stake holders to use the system and achieve better results. InTest will help in performing drivers' tests efficiently.

Target Customers:

- 1- Departments of motor vehicles.
- 2- Vehicle licensing departments.

Solution In a Cube

03 C.I.T. Cash In Transit System

To automate the process of Money, checks and bank documents transfer

Bank HQ -> Branches

Branch -> Branch

(Bank / HQ) -> ATM

ATM -> HQ/Bank

ATM -> ATM

Bank and Branches -> Central Bank

Bank -> Bank

Bank -> other organizations

Money collection:

- 1- Support ATM's process
- 2- Replenishment
- 3- Maintenance
- 4- Inspection
- 5- Collection and installation

04 Car Agency Service Center system

Main Functionalities:

- 1- Routine inspection.
- 2- Receive cars from owners.
- 3- Preventive maintenance.
- 4- Corrective maintenance.
- 5- Taking photos.

Solution In a Cube

05 Fleet Inspection System

Main Functionalities:

- 1- Daily inspection tasks.
- 2- Preventive maintenance tasks.
- 3- Taking photos.
- 4- Maintenance history log.
- 5- Car licensing follow up and notifications.

06 P.O.D. Proof of Delivery System

Control your Deliveries and Pick up

- 1- OFF Line / Online application
- 2- SQL Interface
- 3- Deliveries module
- 4- Pick Up module
- 5- Signature capture
- 6- eMail notification of deliveries and Pick Up
- 7- Synchronize by USB, WIFI, Blue-tooth or GPRS/3G

Target Customers:

- 1- Factories.
- 2- Farms
- 3- Warehouses.
- 4- Distributors.
- 5- Online shopping companies.
- 6- Furniture and home appliances stores.
- 7- Food delivery companies.
- 8- Courier Companies.

Solution In a Cube

07 WAMS Workforce and Asset Management System

- Asset registry and monitoring module
- Automatic work order creation
- Add material and add technician work notes to work order.

Technician module:

- 1- Barcode driven solution
- 2- Handle tickets (service requests)
- 3- Preventive and Reactive work orders
- 4- Asset registry and monitoring module.

Supervisor module:

- 1- Assign new service requests
- 2- Dynamic Get & Push tickets technique
- 3- Automatic device validation and user login

08 InCube Hotel Inspection and Housekeeping Solution

InCube's Hotel Inspection and Housekeeping Solution is designed to facilitate the housekeeping, inspection and maintenance tasks in hotels, resorts and inns. N3HIHS frontend enables the workers to clean, inspect and report status on real time and without delays, with no need to phone calls and extensive follow up.

Target Customers:

- 1- Hotels.
- 2- Motels.
- 3- Served apartments.

09 Franchise Store Inspection System

Franchisee inspection and management system:

- The system is designed for large companies with multiple locations.
- The system will allow Field Managers to visit different outlets, stores, franchisees and perform the following tasks:
 - 1- Delivery
 - 2- Inspection
 - 3- Inventory control
 - 4- Health and safety

10 Municipality Mobility Solutions

Citizen-Centric Solutions

- 1- Mobile or web based applications.
- 2- Allow citizens to report and follow up issues in the streets and then route those complains to pre set of destinations (HYDRO, Municipality, Police Department – based on location)
- 3- System will provide different statistics based on reported issues.
- 4- Allow municipality teams to receive complains .
- 5- Attend and resolve them (mobile work-force management solution)
- 6- Dashboard and reporting.
- 7- Connectivity with social media .

Solution In a Cube

11 Student and Bus Tracking System

InCube's Student and Bus Tracking System is a solution designed to guarantee the safety of school children. The system helps in Daily Pickup and home delivery Route Planning, Navigating Buses for Collection, Collect Students from Pick-up Points, and Drop students at School or home.

Target customers:

- 1- Schools.
- 2- Special needs schools.
- 3- Colleges.
- 4- Universities.

12 F.R.E.D. Firearm Registry Electronic Database

InCube's Weapon Tracking Solution (FRED) is a unique solution that can guarantee the tracking of weapons 24/7 with high availability and security.

- FRED utilizes the latest RFID technology.
- FRED proactively alerts allowing you to act before it is too late.
- FRED is linkable to PLC and controllers such as e-locks and alarms.

Target customers:

- 1- Police Departments.
- 2- Security Companies.
- 3- Shooting Clubs.
- 4- Prisons.
- 5- Law enforcement training centers.

Solution In a Cube

13 Prisoner Transportation System

- Make sure that the prisoners are transferred on the right time to the right place.
- Defining prisoners.
- Linking prisoners to different vehicles, escorting teams and locations.

Transferring prisoners along with:

- 1- Belongings.
- 2- Evidences.
- 3- Reports.

14 Store Management System

System Main Modules:

1. Product Management.
2. Inventory Management.
3. Order and Vendor Management.
4. Integration Module.

Target Customers:

- 1- Restaurants.
- 2- Groceries.
- 3- Retail shops.
- 4- Distributors.
- 5- Pharmacies.

Solution In a Cube

15 InCube Pilgrims Transportation Management

Main functionalities

- 1- Registering Pilgrims.
- 2- Registering buses.
- 3- Checking bus passengers at each stop.
- 4- Record special health problems.
- 5- Link Pilgrim to a bus or multiple of busses.
- 6- Pilgrim information on bus computer
Link of Pilgrim luggage.

16 Pump System

Main functionalities

- 1- Insure Giving the Correct Medication To The Correct Patient.
- 2- Insure The Nurse is Qualified to Give The Medication.
- 3- Insure a Specific Doctor is Prescribing The Medicine For A Specific Patient.
- 4- Monitoring Nurses' Performance.
- 5- Full Patient, Medicine, Nurse, & Doctor History as Well as Storage Management.

Third Party

Now a days, InCube has a Varsity of products covering all aspects of supply chain management process from end to end.

Providing best bread of international solutions for warehouse management, inventory, route optimization, fleet management, driver behavior management, mobility management , mobile application generator, cash management, rout optimization and territory planning and more.

Third Party

Route Planning & optimization

Omnitracs Technologies is world's number one in offering and providing unique and excellent transportation management solutions for over 25 years, and throughout the years they have proven efficiency and high quality of services because they are driven by the ultimate goal of helping businesses that take on their services to be successful. Their solutions are used on daily basis at more than 3,500 locations globally, managing over 154,000 vehicles.

Roadnet Transportation Suite from Roadnet Logistics Technologies can help your business achieve profitability and guaranteed results in the world of mobility and logistics and in every aspect of your Order-to-delivery process. The Roadnet Transportation Suite is a certain, industry-leading product that has been tested on real roads in terms of achieving strategic, tactical, and operational dominance. This product contains several modules that can be stand-alone or combined together and each have proven and given optimized results, and are extremely configurable in its design. So in simpler words, The Roadnet Transportation Suite adjusts to the way you run your business operations and to the way you do your work with easy integration. It contains the following modules:

Third Party

Remote Management Solution - SOTI

Enterprise mobility is a complex management challenge. A combination of purpose-built devices, corporate-liable smartphones and tablets, and BYOD is necessary to drive productivity and business growth, but can be difficult to manage with point solutions. **SOTI** unifies mobility management from a single management console, removing the complexity from managing a multi-OS, multi-vendor, and multi-purpose mobile ecosystem. **SOTI** MobiControl is a unified enterprise mobility solution that provides the ability to manage mobile devices, applications, content, email, and security within an enhanced, secure, all-in-one offering.

Cash Management Solutions - TransTrack

TransTrack is a global leader in software solutions for the cash supply chain, becoming and remaining an established brand in the markets we are active in. Over the last 5 years **TransTrack** has been a global leader in Cash-In-Transit (CIT) automation with our standardized software solution. **TransTrack** is uniquely positioned in providing end-to-end cash supply chain management solution and continuously bring innovation to the cash supply chain, aiming at a more secure and more efficient supply chain and a lower cost of cash to society.

Fleet & Transportation Management - Rietveld

Just like every other alert business operator, you want the processes in your organisation to run smoothly and you want complete insight into the utilisation of your company's assets.

To achieve this, you want to use a modern, user-friendly fleet management system that offers the convenience of the latest technology, one that is smart, efficient, scalable and very user-friendly. The ingredients of EasyTrack.

Third Party

Warehouse & Supply Chain Solutions - Generix

The customer expects to benefit from a very broad product range, access to the best prices and personalized services, especially in terms of delivery time or for the packaging and labeling of parcels and pallets.

To adapt to these expectations, logistics coordinators must be able to handle an increased number of references and formats, organize their inventory well and prepare in various modes, whilst reducing their costs.

With Warehouse management, they can speed up the placing in storage, use all available space, pool resources, intelligently schedule preparations, automate processes and rapidly deploy new sites in new geographical areas.

The most advanced navigation - Sygic

Sygic Car Navigation is specially optimized to work with your car's built-in infotainment system. Just download the offline maps to your smartphone, connect smartphone to your car's dashboard with a USB cable, and you are ready to drive.

Maps Solution by NOKIA - HERE

HERE, is a global leader in the mapping and location intelligence business. Rooted in almost three decades of experience in cartography, our vision is simple: offer the world's best maps and location experiences across multiple screens and operating systems. We want to help people navigate their lives with ease and confidence every day and everywhere. We believe that giving people a better and deeper sense of location will be essential to live a modern urbanized life.

Our Vision

InCube has many years of accumulated experience in industrial automation, business process reengineering, business process management, HR, production, optimization, sales and distribution and more.
