Power Generation

Solar Pumping Invertor (SPI)

a new generation of solar pumping systems that directly operate pumps up to 750 HP from Solar PV arrays. It does not need use of the grid during day time pumping and automatically switches to hybrid mode (Solar and AC power) during non-daylight hours or early morning when used in 24/h operation. These systems can operate all types of industrial pumps in any application, city scale water plants, sewage plants, and irrigation.

Let the sun do the work!

Insulation board (XPS)

(XPS) insulation is a closed cell, moisture-resistant rigid foam board well suited to meet the need for a wide variety of building applications. XPS insulation is ideal for many residential and commercial construction applications such as wall furring, perimeter/foundation, cavity wall, pre-cast concrete, crawl spaces, sheathing and other applications. XPS insulation is classified as a Type X product when tested in accordance with ASTM C578 and provides a long-term thermal performance of R-5 per inch. XPS insulation is made with Owens Corning's patented Hydrovac process technology under strict quality control measures, which makes it highly resistant to moisture and permits the product to retain its high R-value year after year even after prolonged exposure.

Features & specifications

- Exceptional moisture resistance, long-term durability
- The only XPS foam to be GREENGUARD Children & Schools Certified
- The only XPS foam with certified recycled content— certified by Scientific certification Systems (SCS) to contain a minimum 20% recycled content
- Will not corrode, rot or support mold growth
- Reusable
- Lightweight, durable rigid foam panels are easy to handle and install
- Easy to saw, cut or score
- Available in square, tongue and groove or scored square edge
- Compliant with building codes and standards
