

Arcam, a GE Additive company, brings together best-in-class Additive Manufacturing systems, the highest quality materials and real-world production expertise, changing the way manufacturers conceive and produce metal components. Together we use our collective knowledge to inspire and disrupt conventional thinking. Through our solution orientation, Arcam is an innovative partner for advanced manufacturing, primarily in the aerospace and medical industries.

Arcam provides Electron Beam Melting systems through Arcam AB in Sweden, powder metals through AP&C in Canada and implant contract manufacturing through DTI in the USA.

Join us at Arcam and become part of the additive revolution!

## Continuous Integration Engineer

**Arcam** works with the latest in additive manufacturing (also known as 3D printing) and we are the forefront in our field. We believe that you are an ambitious, goal-oriented person who understands what is needed to complete and finalize a project. You enjoy working in a creative and integrated environment where you'll be taking responsibility and having influence.

**We are now looking for** a developer with focus on continuous integration to join our Software team. You will work with a highly skilled team of developers and engineers and have a key role in managing our continuous integrations systems, which includes building up our automated testing environment.

**As a continuous integration engineer** you will create automated software build processes in support of ongoing software development efforts. You will provide day-to-day support to manage development tools, code repositories and utilities currently deployed, upgrading when necessary in the least disruptive manner.

You will work to continuously improve speed, efficiency and scalability of the systems as well as the continuous integration environment. You will also create and maintain continuous integration process documentation.

The role includes developing and supporting backup and recovery strategies and provide continuous integration training when needed.

**We're looking for outstanding engineers who can bring:**

- A degree-level education (or equivalent)
- Experience of automation and continues integration in an agile system development context
- English and Swedish language skills to business standard
- Experience in relevant techniques, for instance: Bit bucket server, Bamboo, Powershell, Ansible, Artifactory, SonarQube, Docker, .Net Framework, C#, NUnit

**Candidates who want to stand out would also be able to show us:**

- Experience from DevOps

**We offer**

A fun, flexible and technically advanced environment with interesting customers. Full time position with a wide variety of added employee benefits, including bonus, flexible working hours, health and pension insurance benefits. We offer you an exciting and global working environment which will give you valuable

experience and contribute to your future development. You will get the opportunity to interact with highly committed colleagues from different cultures.

We strive for gender balance and believe that actively prioritizing a high level of diversity in our workforce creates competitive advantage. It is our people that make the difference!

Finally, we hope you will learn as much from us as we will from you!

**Contact**

In this recruitment process we are collaborating with Dfind IT. If you have any questions regarding the position you are welcome to contact the responsible Senior Recruitment Consultant Cecilia Karlsson at +46 70 346 80 95 or by e-mail [cecilia.karlsson@dfind.se](mailto:cecilia.karlsson@dfind.se).

**Apply now and join our team!**

Interviews will be held continuously. To apply, please register your application as soon as possible.
