

## **Amplicon Express signs Exclusive Distribution Agreement with AR Brown.**

Since 2002, Amplicon Express and AR Brown have worked together to provide Genomic Services to the scientific community with great success. We have now expanded our relationship with AR Brown to include all of the Pacific Rim of Asia (Taiwan, South Korea, China, Singapore, Vietnam, Malaysia etc).

This Exclusive Distribution Agreement will allow the strengths of both companies to offer services in efficient and cost effective ways to clients. Amplicon Express has new technology in Next Gen libraries and strong presence in cloning and BAC services sector.

According to General Manager of AR Brown, Mr. Okada, "The reason AR Brown is a proud corporate sponsor for PAG Asia conference is that we see the rapid growth in Life Sciences across Asia. AR Brown is committed to helping customers in North America and Europe gain access to these Asian biotech markets. Through AR Brown they will have a locally based high quality technical staff without all the expenses associated with opening an overseas office. AR Brown adds value to our clients by facilitating access to projects that are only obtained via local bidding and by handling all the challenges associated with import/export."
