Enprise 2016 Product Roadmap

General Strategy

This year is one of progress and renewal at Enprise Software. As a result of the acquisition of Enprise Software in November 2015 (read more [here](#)), a great deal of emphasis is being placed on focusing efforts on alignment with current SAP Business One capabilities, product quality, and performance. Significant investment is being directed to strengthening the Enprise Software development team and processes, and aligning with key industry verticals where Enprise Software is best suited.

The product road map for 2016 reflects this renewed focus. Much as already been accomplished during the first part of this year, which is demonstrated in this document. During the balance of 2016, the Enprise Software team will continue to build out an expanded roadmap for 2017 and beyond, in addition to delivering on the specifics set out here. Read on to learn more about our 2016 roadmap, and please don't hesitate to reach out to us with any questions, concerns, or suggestions.

Accomplishments Year-to-Date

Did you know that the Enprise product suite is supported on versions 9.1 and 9.2 of SAP Business One? HANA is also currently supported for SAP Business One version 9.1, and support for SAP Business One 9.2 on HANA will be available during second quarter. A number of performance improvements have also been delivered.

Web/Mobile Access

Enprise Anywhere has been designed as the eventual successor to Enprise Service and Enprise Service Pro. If you currently own these products, your investment is protected; an upgrade path will be provided following general availability. Enprise Anywhere is currently in ramp-up, and will be released to the market at the end of second quarter. Further enhancements to Enprise Anywhere and an all-new product delivered later in 2016 will demonstrate a strong focus on the web and mobility.

A New Product for Enprise

Enprise Software will be releasing a fresh, new product later this year, separate from Enprise Job and designed specifically for Professional Services firms. This additional product will further solidify our position in service-based industries.

Read on to learn more about our plans for this year.

Roadmap Details By Quarter

The following Enprise product and feature enhancements are either already available or planned during the balance of the 2016 calendar year. Additional information regarding the Enprise Product Roadmap beyond 2016 will be published in fourth quarter.

First Quarter 2016

- 1. Performance Enhancements.** A number of performance enhancements have already been provided in software releases of Enprise Job during the first part of this year. Enprise will continue to place a focus on improved performance in the product suite.
- 2. HANA Compatibility for SAP Business One version 9.1.** Compatibility with HANA has been available for the following since early March 2016:
 - Enprise Job
- 3. SAP Business One version 9.2 Compatibility (MSSQL).** The following Enprise products are now compatible with version 9.2 of SAP Business One on Microsoft SQL:
 - Enprise Job
 - Enprise Automate
 - Enprise Rent
 - Enprise Bank
 - Enprise Import GL

Second Quarter 2016

- 1. Enprise Anywhere.** The next generation web-based companion solution for Enprise Job, currently in ramp-up, will be generally available to the market during the second quarter with licensing levels equivalent to the existing Service and Service Pro solutions.
- 2. HANA Compatibility for SAP Business One version 9.2.** will be available during second quarter for the following products:
 - Enprise Job

3. **Extended Functionality for Enprise Job.** The following features available in current versions of SAP Business One will be extended within the Enprise Job product:
 - Units of Measure
 - Pricing

Third Quarter 2016

1. **HANA Compatibility for SAP Business One version 9.2.** will be available during third quarter for the following products:
 - Enprise Anywhere
2. **Extended Functionality for Enprise Job.** The following features available in current versions of SAP Business One will be extended within the Enprise Job product:
 - Advanced GL Determination
 - Multi-branch capability
4. **Enhanced Features for Enprise Automate.** Additional functionality will be made generally available to the market for Enprise Automate, a companion solution to Enprise Job that allows scheduling of recurring Invoices or Service Calls based on a number of parameters.

Fourth Quarter 2016

1. **Enprise Job Planning Board.** A browser-enabled planning board (GANTT) has been developed for Enprise Job, and will be made generally available in fourth quarter.
2. **Enprise Job Dashboards.** Analytics capabilities will be made available within the Enprise Job and Enprise Anywhere products.
3. **Project Management – A New Product.** Enprise Software will release a fully web-based project management solution to the general market in fourth quarter. Targeted at professional services firms, this mature solution has an established customer base and offers a fresh, HTML5-based user interface. The product, which will support SAP Business One on both HANA and MSSQL platforms, is not a replacement for Enprise Job, but rather will expand the reach of Enprise Software to customers where Enprise Job may not be ideally suited. A full product launch along with details of the complete feature set will occur during the second half of 2016.

Ongoing Product Roadmap Planning

Further roadmap planning will occur during the balance of the 2016 calendar year, with input from partners. As part of these efforts, support for other features will be evaluated, including, but not limited to:

- SAP Business One 9.2 Browser Access
- The application of inherent HANA capabilities to the Enprise product suite.

There are currently no plans to integrate Enprise Job with the new Project module available in SAP Business One version 9.2, as the new functionality offered is currently extremely limited. This will continue to be monitored during ongoing Enprise roadmap efforts. For more information on a comparison between Enprise Job and the Project module in SAP Business One version 9.2, refer to the article in the News section of our website, which can be found [here](#).

The Enprise product roadmap is an ongoing, active initiative. As a result, updates or revisions to this document may be published from time to time.
