

Disclaimer/Instructions in regards to our ebooks:

The link from our bookstore is only good for one download. If the eBook opens in another tab (in your web browser), click on the 'download' symbol immediately. *DO NOT save the link in your Favorites or in your bookmarks. Once the ebook opens, our website assumes your download was successful, considers it a purchase, and disables the link.

You will need to know where your default "Download File" destination is. Due to the vast makes, models & Operating Systems of PC's, Mac's, iPhone's, iPad's, and other devices, we are not always able to provide assistance on where the downloaded file may have gone on your particular device. If unable to locate, and depending on your device, you may need to reach out to support for your type of device. If a step got missed or the download failed, due to connection, etc, contact us - we are not able to 'resend' the link but we can offer other solutions. Download on most iPads may go into iBooks, unless you have changed it in preferences. On Mac computers it usually save into the "Downloads" folder.
