Preventative Maintenance Schedule

For use with Autobrade Red 3/8" Impact Wrench.

This service chart is published as a guide to expectant life of component parts. The replacement levels are based on average tool usage over one year. Dynabrade Inc. considers one year usage to be 1000 hours or 50% of a man year. Parts included in tune-up kit are identified by High Wear and Medium Wear items.

Components of Model 18061:

Note: The preventative maintenance schedule is based on proper lubrication. Dynabrade recommends Dynabrade Air Lube (95842) at a rate of 1 (one) drop per minute. If Dynabrade Air Lube is not compatible with paint system, it may be substituted with compatible air lubricant with water absorbing properties to prevent internal components from rusting. Improper lubrication shortens life of the following components: 18714 rotor; 18715 blades; and bearing.
