Vision: Always be ready to repair all kinds of machinery to ensure every single machine remain their usefulness all the time.

Mission: Recruit more workers in order to increase the capability of the company to challenge larger amount of business next year. Moreover, increase 15% of our profits for the following year.

History

In year 1985, our company was founded by Mr. Ng Lai Lam. The company was an automotive repair company which basically **repairs car, lorry, forklift, excavator as well as crane**. We had total 4 to 5 workers on this year.

In year 1995, we created another branch for transportation businesses. Unfortunately, a lot of bad debts occurred during the economic crisis in 1997, which made us suffered in the cash flow issues. So we decided to close the branch and gathered all our remaining capitals to do some repairing and trading businesses in order to survive in this inflation market. After few years, we had successfully overcome the difficulty situation.

In year 2002, under a coincidence, we started to receive sub-projects from Asia Port Company. Basically, the main two projects we received from Asia Port Company were **Tractor Terminal Maintenance** in Westport and **Quay Crane Railway Replacement** in Northport. We had around 20 workers on this year.

In year 2005, our high working effectiveness and efficiency made us become one of the best servicing companies in Westport. Due to that, we were invited by Kalma Company to get the **Tractor Terminal Maintenance** sub-project in Northport.

In year 2008, after all the great efforts, we finally stand a chance to get the projects directly from Westport by using our own company's name. We really appreciate Westport to give us the opportunities to work with them, so that our company could grow rapidly in this year.

In year 2017, we continuously served Westport with all our best. During these years, we completed many projects in Westport Terminal such as **Tractor Terminal Maintenance, Repair, Overhaul, Refurbishment, and so on**. We had around 35 workers on this year.

Business Briefing

1. We Overhaul, Repair and Maintain Tractors/Vehicles
 - If you have many vehicles running for your business, increase the lifespan and maintaining the availability for those vehicles in a reasonable cost to ensure your business running smoothly could be very challenging. However, by signing our services, achieving those objectives is just a piece of cake.
2. We Rent and Trade Forklift
 - We have plenty range of good condition forklift to rent and sales. Also, we are looking forward to purchase used forklift from you.
3. We Manufacture Pile Joints and Having Good Steel Craft
 - We have the capability to produce many types of pile joints. However, with our good steel craft, we are able to produce many kinds of steel products, such as steel container, steel signboard and etc.
4. We Sells Several Machinery Spare Parts
 - We are selling huge range of different spare parts for tractors/vehicles.
