

**Fund Fact Sheet | Share Classes: A, C**

**Fund Description**

The fund seeks capital appreciation, which may occasionally be short term, with income as a secondary goal, investing at least 80% of its net assets in securities of financial services companies. It focuses primarily on undervalued equity securities which may include foreign securities and, to a significantly lesser extent, merger arbitrage securities and securities of distressed companies.

## What Are the Risks?

All investments involve risks, including possible loss of principal. Value securities may not increase in price as anticipated or may decline further in value. Special risks are associated with foreign investing, including currency fluctuations, economic instability and political developments. Investing in a single-sector fund involves special risks, including greater sensitivity to economic, political or regulatory developments impacting the sector. Because the fund may invest its assets in companies in a specific region, including Europe, it is subject to greater risks of adverse developments in that region and/or the surrounding regions than a fund that is more broadly diversified geographically. Current political uncertainty concerning the economic consequences of the departure of the United Kingdom from the European Union may increase market volatility. Smaller-company stocks have exhibited greater price volatility than larger-company stocks, particularly over the short term. The fund's investments in companies engaged in mergers, reorganizations or liquidations also involve special risks as pending deals may not be completed on time or on favorable terms. The fund may invest in lower-rated bonds, which entail higher credit risk. Please consult the prospectus for a more detailed description of the fund's risks.

## Glossary

**Beta:** A measure of the fund's volatility relative to the market, as represented by the stated Index. A beta greater than 1.00 indicates volatility greater than the market.

**Standard Deviation:** A measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.

**Fund Management:** CFA® and Chartered Financial Analyst® are trademarks owned by CFA Institute.

**Performance:** The fund offers other share classes subject to different fees and expenses, which will affect their performance.

Class A: Prior to 9/10/18, these shares were offered at a higher initial sales charge of 5.75%; thus actual returns would have differed. Total returns with sales charges have been restated to reflect the current maximum initial sales charge of 5.50%.

Class A and Class C: Prior to 11/1/96, the fund offered only a single class of shares without a sales charge and Rule 12b-1 expenses, Class Z shares. Figures reflect a restatement of the original share class to include both the Rule 12b-1 fees and maximum initial sales charges (when quoting figures with sales charges) applicable to each share class as though in effect from the fund's inception. For periods after 11/1/96, actual performance is used, reflecting all charges and fees applicable to that class.

**Top Ten Holdings:** The portfolio manager for the fund reserves the right to withhold release of information with respect to holdings that would otherwise be included.

**Composition of Fund:** Percentage may not equal 100% due to rounding.
