

Step 1: Identifying and Limiting a Topic

TEMPLATE: Kick-start your thinking

Use the following template to guide thinking about possible areas of research.

Adapted from Mertler, C.A. (2014). *Action research: Improving schools and empowering educators*. Thousand Oaks, CA: Sage, 30.

Adapted from Mertler, C.A. (2014). *Action research: Improving schools and empowering educators*. Thousand Oaks, CA: Sage, 35.

Step 2: Gathering Information to Build Idea(s)

TEMPLATE: Probing the Research Question

Use the following template to guide thinking about specific aspects of your research question. The goal of the template is to clarify an area of focus for your research. If an item does not pertain to your question, skip it. Additional questions may be added to the end.

RESEARCH QUESTION >>>	
What	•What evidence exists that what you perceive is a problem is an actual problem?
Who	•Who are the stakeholders (specific students, administrators, parents, etc.) that are affected by the problem?
How	•How is this program, material, concept, etc. currently implemented, taught, etc.?
How	•How is the this program, material, concept, etc. currently reinforced or maintained?
How	•How is the effectiveness or mastery of this program, material, concept, etc. currently evaluated or assessed?
Where	•Where does the program, material, concept, etc. fit into the program's mission, course content, etc.?
When	•When during the school year does this program occur, is the material taught, is the concept covered, etc.?
?	
?	

Adapted from Mertler, C.A. (2014). *Action research: Improving schools and empowering educators*. Thousand Oaks, CA: Sage, 60.

Step 3: Reviewing Related Literature

TEMPLATE: Planning Your Action Research Literature Review

Use the following template to guide your for your literature review. Group/categorize your findings and incorporate your research for your topic.

Introduction

Describe your overall topic, why it is important, and why you are interested in it:

List any major themes, subtopics, or trends in research questions, methodologies, results, and/or conclusions:

Body

THEME A (*broad word or phrase that synthesizes a subset of your literature*):

-Overview of characteristics Theme A:

Subtopic 1 (*narrowly grouped findings related to theme*):

Study 1:

Study 2:

Study 3:

Subtopic 2 (*narrowly grouped findings related to theme*):

Study 4:

Study 5:

Study 6:

Subtopic 3 (*narrowly grouped findings related to theme*):

Study 7:

Study 8:

Study 9:

...etc....

THEME B (*broad word or phrase that synthesizes a subset of your literature*):

-Overview of characteristics Theme B:

Subtopic 1 (*narrowly grouped findings related to theme*):

Study 1:

Study 2:

Study 3:

Subtopic 2 (*narrowly grouped findings related to theme*):

Study 4:

Study 5:

Study 6:

Subtopic 3 (*narrowly grouped findings related to theme*):

Study 7:

Study 8:

Study 9:

...etc....

Continue addressing themes as appropriate for your overall research topic. You should discover the narrowing focus of the literature review as you progress through the themes and subtopics.

Summary

Discuss the contributions of literature to the broader field of education (and/or a more specific field such as gifted education, ESL education, etc.):

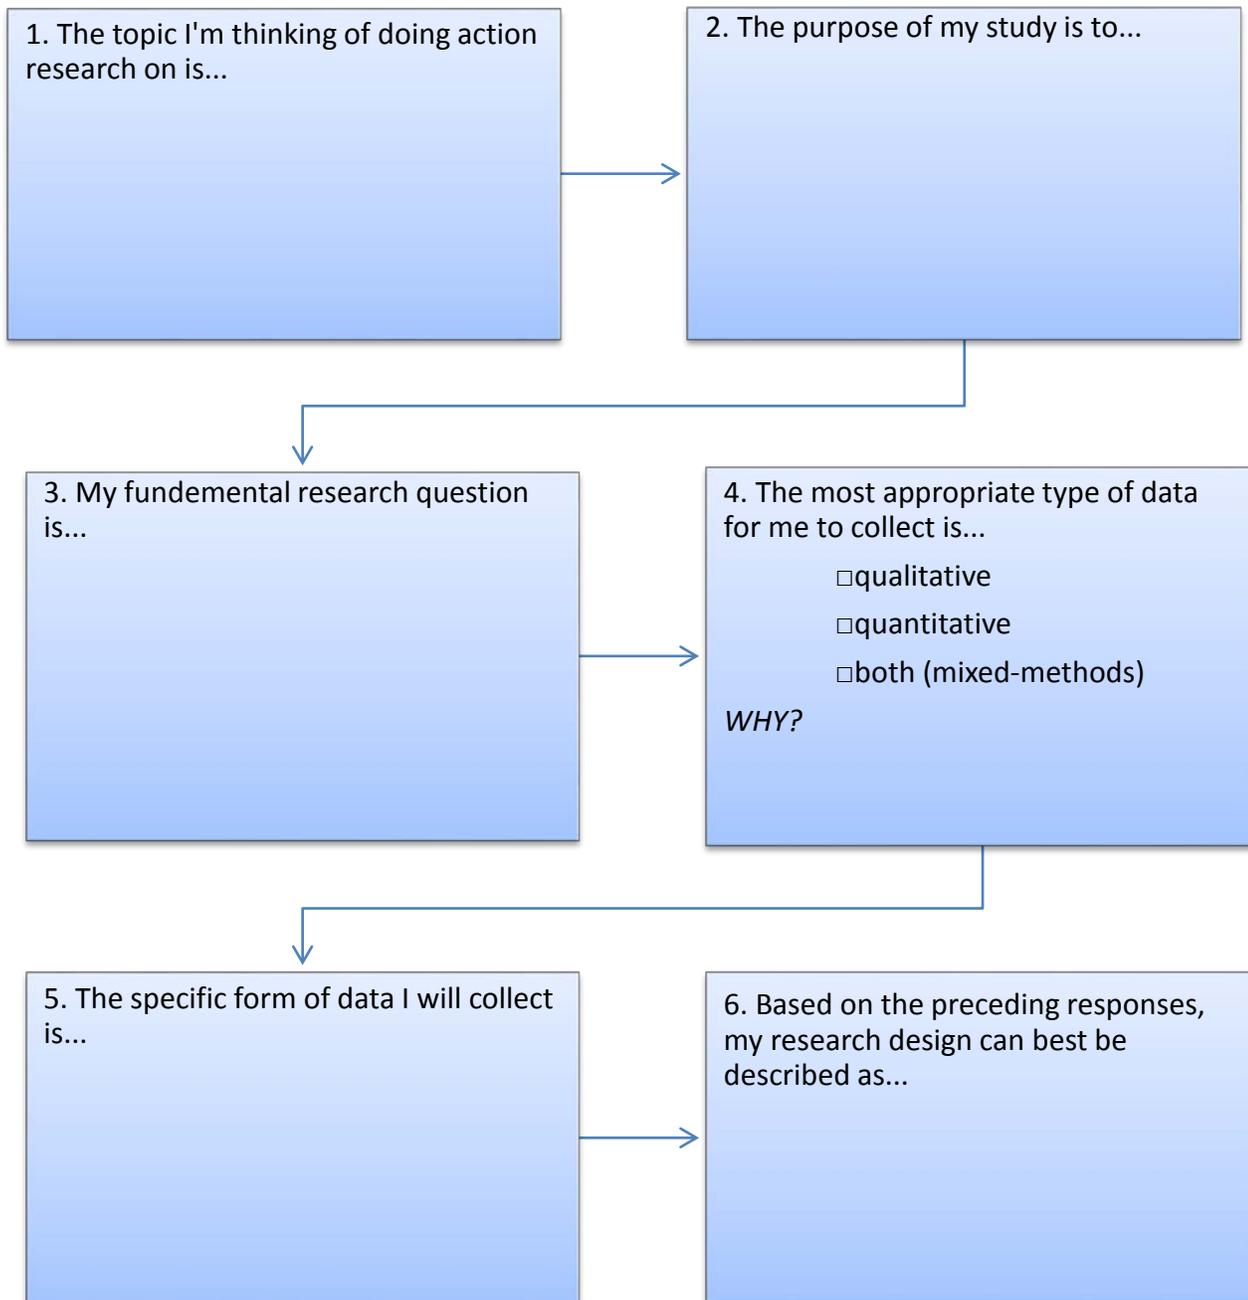

Identify and discuss the pro/cons, strengths/weaknesses of this body of literature:

Discuss what is missing from this body of literature that will serve as a focus for your study/methodology:

Step 4: Developing a Research Plan

TEMPLATE: Action Research Design Development

Use the following template to guide thinking as plot out your research design.

Remember... All aspects of your study and its design must be PARALLEL! Will your DESIGN seek the CORRECT DATA that will ANSWER YOUR RESEARCH QUESTION???

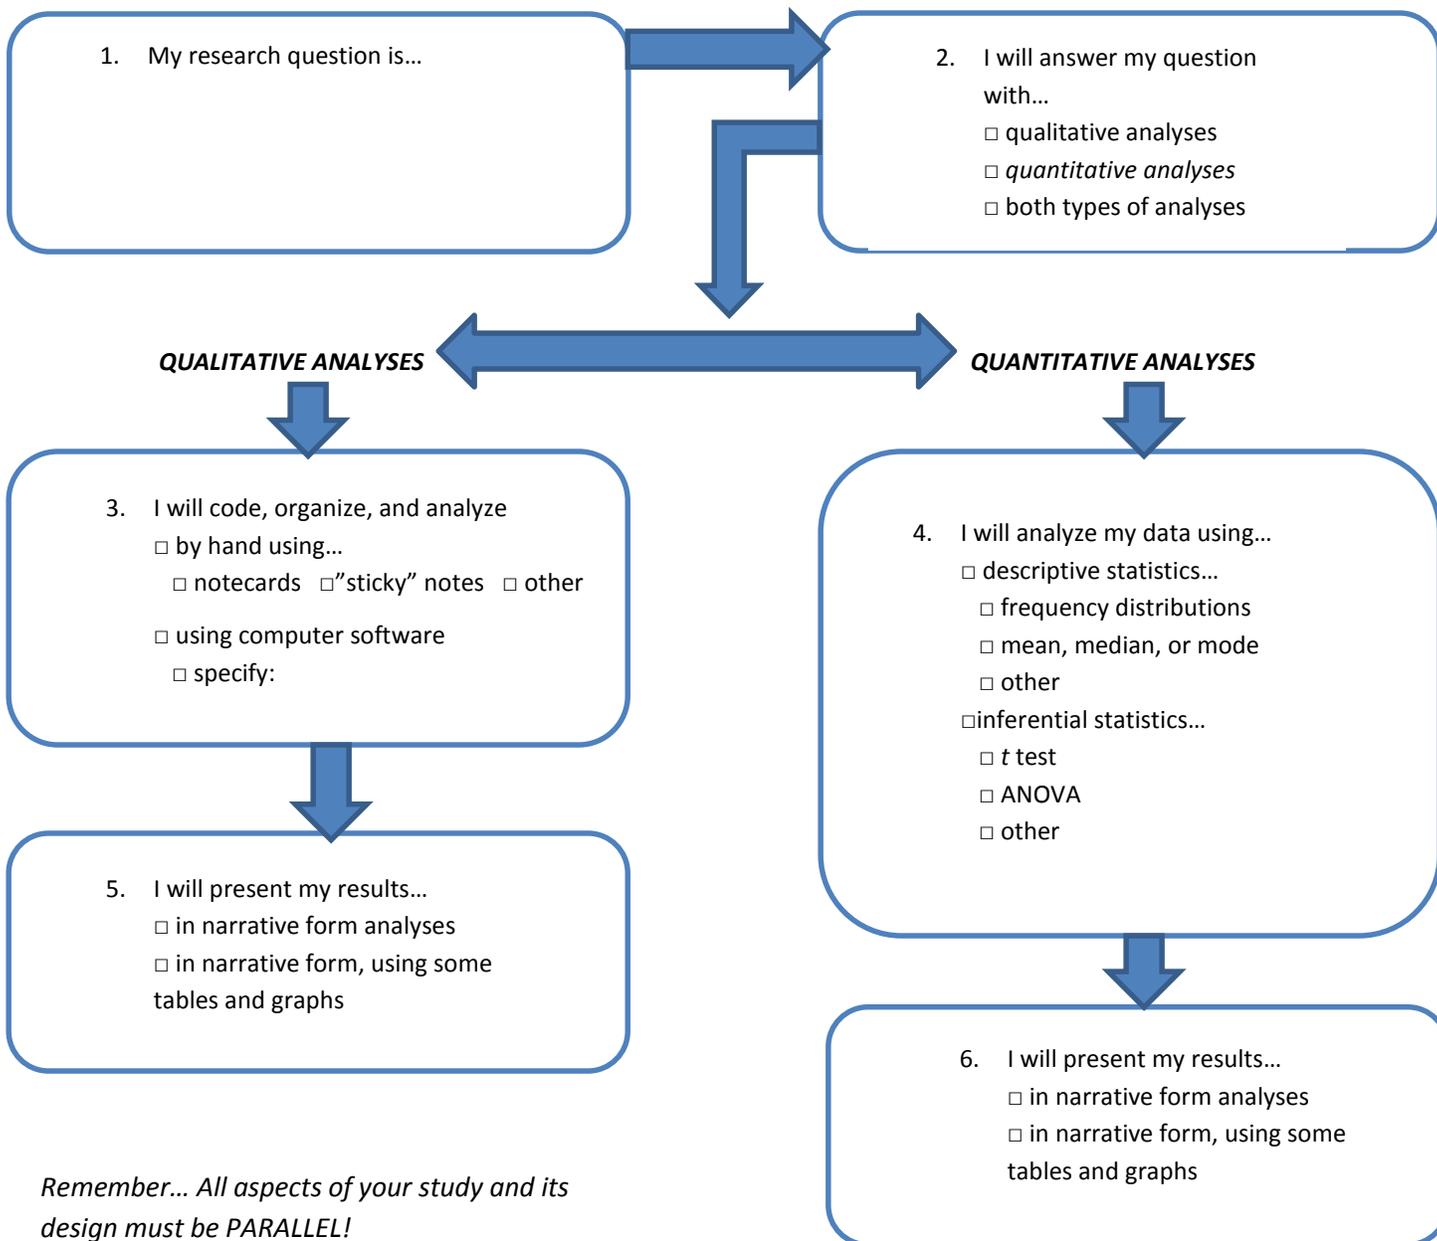

Mertler, C.A. (2014). Appendix C of *Action research: Improving schools and empowering educators*. Thousand Oaks, CA: Sage.

Dearman, C., Miller, J., Schaeffer, K., Troxclair, D. (2015, March). *Handout: Action research made easier*. Presentation delivered at TAGT Research Division Webinar

Steps 5 & 6: Implementing the Plan, Collecting the Data, & Analyzing the Data

TEMPLATE: Planning for Data Collection

Use the following template as you plan for your approach for data analysis.

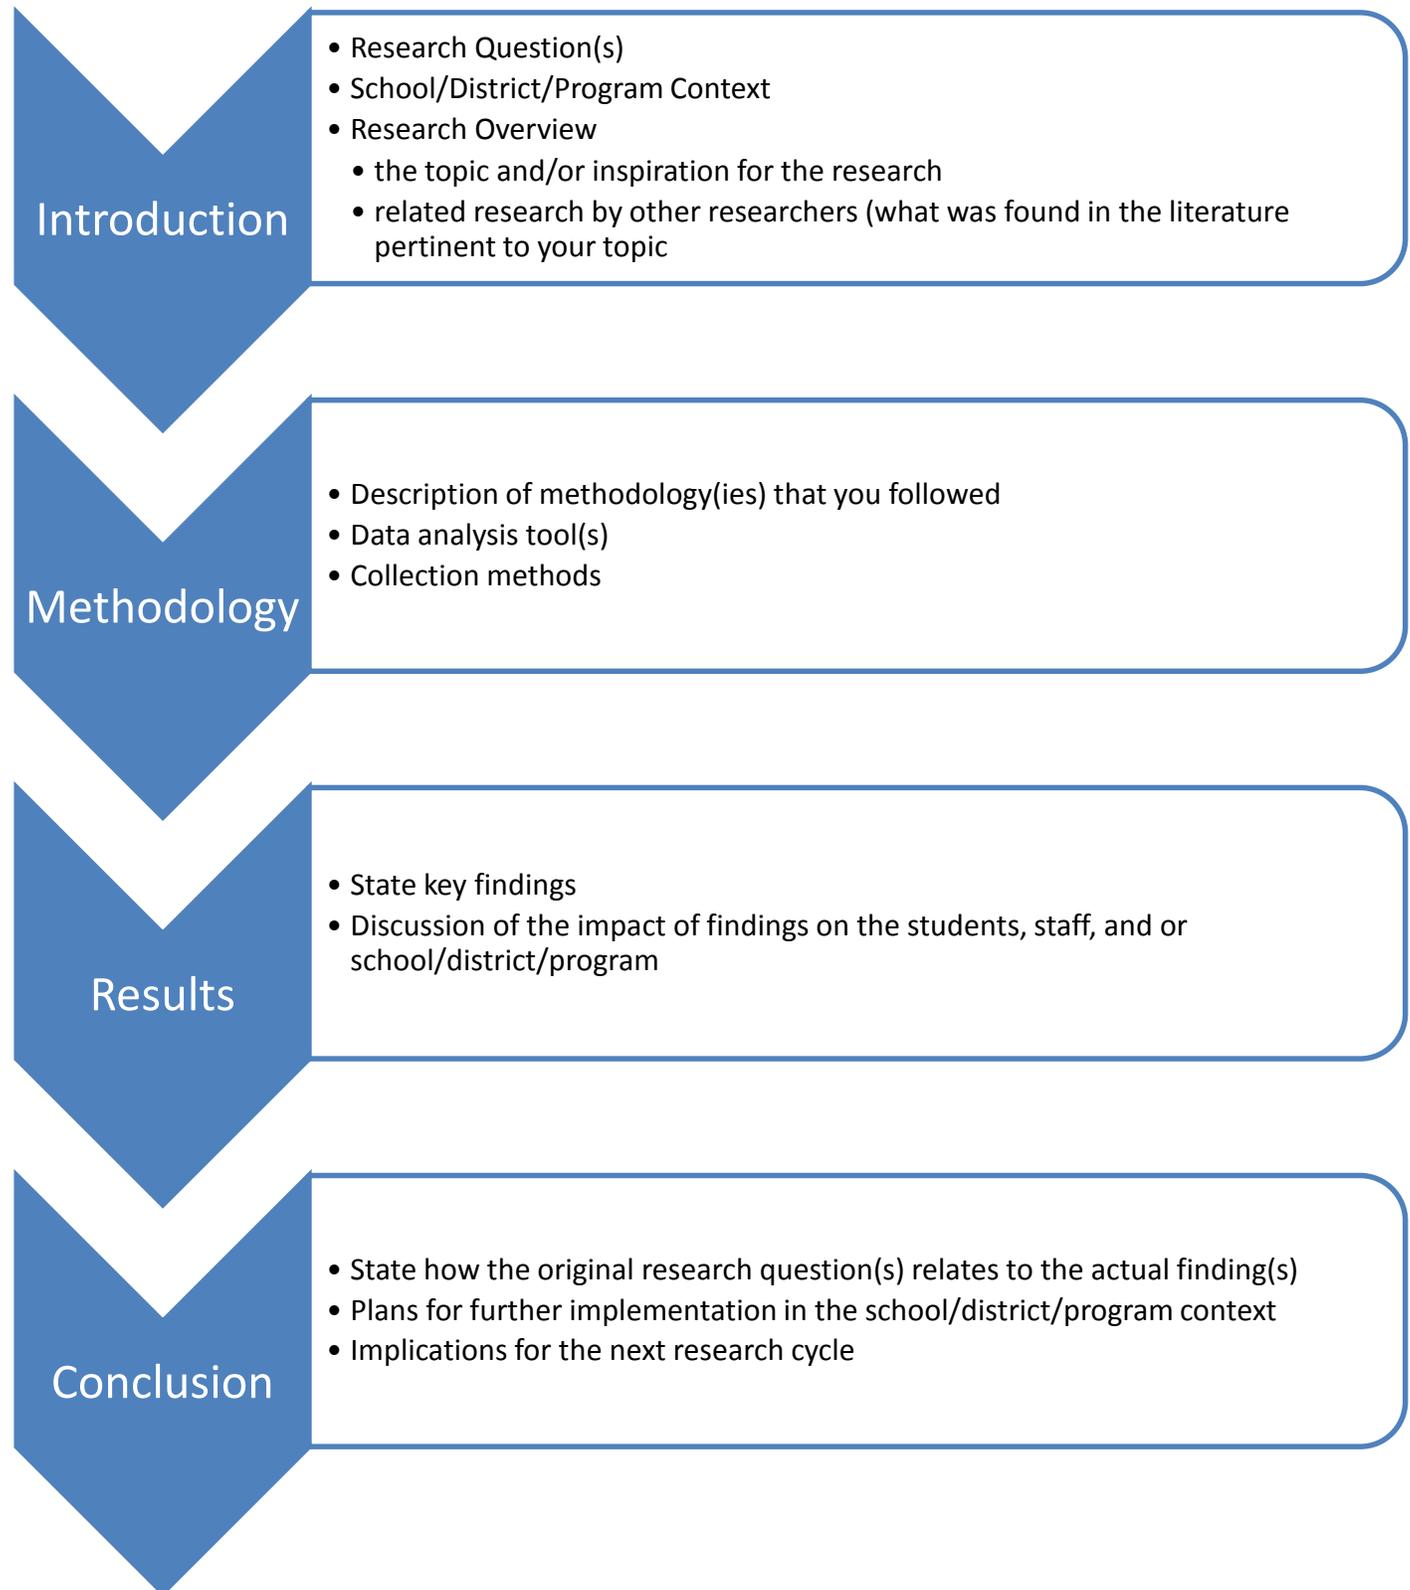

Remember... All aspects of your study and its design must be PARALLEL!

Will your DESIGN seek the CORRECT DATA that will ANSWER YOUR RESEARCH QUESTION???

Mertler, C.A. (2014). Appendix C of *Action research: Improving schools and empowering educators*. Thousand Oaks, CA: Sage.

Step 8: Writing an Action Research Report

TEMPLATE A: Research Report

Adapted from State of New South Wales, Department of Education and Training. (2007). *Professional learning and leadership development: Action research abstracts*. Retrieved from <https://www.det.nsw.edu.au/proflearn/research/abs2.htm>

Dearman, C., Miller, J., Schaeffer, K., Troxclair, D. (2015, March). *Handout: Action research made easier*. Presentation delivered at TAGT Research Division Webinar
