

### Checklist for Daily Cleaning / Disinfectant of Vehicles

We have enacted new emergency standards for vehicle cleanliness and disinfection protocols during daily and weekly upkeep as well as increasing frequency of vehicle inspections. Below is an enhanced recommended checklist for daily cleaning.

Thank you in advance for your continued service and dedication.

<input type="checkbox"/>	<b>After transporting the patient, leave the rear doors of the transport vehicle open to allow for sufficient air changes to remove potentially infectious particles.</b>
<input type="checkbox"/>	<b>Do not touch eyes, nose or mouth with unclean hands.</b>
<input type="checkbox"/>	<b>Refrain from keeping food and drinks in the vehicle while transporting.</b>
<input type="checkbox"/>	<b>Keep Kleenex and hand sanitizer for use and disposal bags/containers for disposal of trash.</b>
<input type="checkbox"/>	<b>When cleaning vehicles each day, drivers should wear disposable gloves and throw away after each use; washing hands for at least 20 seconds after disposing of gloves.</b>
<input type="checkbox"/>	<b>Drivers should clean vehicle daily so that it is free of trash and debris. Clean vehicle with disinfectant wipes and spray to “high Touch” areas in vehicle with LCP provided cleaning products/wipes.</b> -Use clean wipe for each surface and wipe area in one direction to prevent recontamination (not back & forth). -After disposing of gloves worn while cleaning. wash hands at least 20 seconds.
<input type="checkbox"/>	<b>Drivers should clean “High Touch” areas in vehicles including but not limited to: steering wheel, front panel, dashboard, air vents, knobs and switches, door panels, door handles, console, seats, seat belts, mirrors, windshield, windows and window controls, interior lights, , floor mats and any equipment; such as wheelchairs.</b>
<input type="checkbox"/>	<b>Drivers should also clean electronic devices used while in vehicle, such as phones, chargers, tablets and laptops.</b>
