

SCHOLARSHIPS TIMELINE CHECKLIST

FRESHMAN YEAR

- Go to office hours of at least 1 faculty member each semester and talk about something other than coursework.
- Get involved in a student organization, community organization, volunteer experience.
- Line up a research project for the summer or following fall semester.
- Investigate study abroad options and where they may fit into your plan of study. Discuss with your academic advisor and consider what you want to achieve while you're abroad.
- Research NISO scholarships and to which you may apply, including freshmen year. Map out the timeline for sophomore scholarships and goals for junior year scholarships.
- Apply to NISO Freshman Workshop.

SOPHOMORE YEAR

- Schedule an appointment with NISO early in the fall semester to discuss your interests.
- Take advanced courses, especially those in your major/minor areas.
- Spend time with your research/project advisor, internship supervisor, student org advisor, community organization contact throughout the year discussing your future aspirations, current relevant events, disciplinary literature.
- Talk with at least 2 additional faculty each semester about something other than coursework.
- Research and read scholarly works within your discipline often.
- Get involved in additional student organizations, community organizations. Lead at least one initiative and document your impact.
- Seek out additional leadership roles, research, projects, internships, for summer and junior year.
- Study abroad or solidify plans to do so.
- Revisit scholarship websites to review selection criteria and read through scholar profiles.
- Attend NISO information sessions for all scholarships you have interest in, even if you can't apply until a future year. (NISO Scholarships Week, UK and Ireland Scholarships Week, Fulbright Week)
- Apply to NISO Sophomore Workshop.

JUNIOR YEAR

- Study abroad if you haven't already done so. If you have, feel free to do so again!
- Repeat any items you can under sophomore year above.
- Many application processes take place this year. Attend info sessions/callouts to learn details about application process(es).
 - Attend workshops provided for the specific scholarships to which you are applying.
 - Solicit recommenders for all junior year applications. You may need to meet with them multiple times prior to the recommendation deadlines. This includes senior opportunities for which application processes begin junior year.
 - Applications to the Fulbright Program, Churchill, Gates Cambridge, Marshall, Mitchell, and Rhodes Scholarships are begun Spring of junior year and submitted just after the semester begins senior year.

SENIOR YEAR

- Seniors and recent grads are eligible to apply for the Fulbright Program, Churchill, Gates Cambridge, Marshall, Mitchell, and Rhodes Scholarships. You will have a gap year to fill with study, work, or service if you didn't begin the application junior year. Please contact NISO to work out a timeline. Graduate students may apply to the Fulbright, Marshall, and Mitchell Scholarships.
- Students in 5 year programs should consult with NISO as soon as possible to determine application timelines. Many opportunities listed under Junior Year may have flexible eligibility during the fourth year.

SCHOLAR DEVELOPMENT TIPS

AS AN UNDERGRADUATE

- TAKE CHARGE OF YOUR EDUCATION. Don't wait for opportunities to land in your lap. It's up to you to make sure you aren't just another face in the crowd.
- Take advanced courses early and often. Be strategic beyond the class that fits in your schedule.
- Avoid large lecture classes when possible. If it can't be avoided, be purposeful in your interactions with the instructor and take particular advantage of the professor's office hours.
- Work on your writing skills.
- Develop mentoring relationships with faculty, staff, and others.
- Take multiple courses with the same faculty if you like them.
- Attend brown bag seminars and public lectures to meet faculty and students who share your interests.
- Find ways to present your own research, public service, community impact, and independent projects.
- Make an impact. Get involved in extra-curricular activities that connect to your future aspirations – don't just join organizations for a line on your résumé.
- Use your summers wisely. Participate in research (on campus and off – NSF REU, SURF or other), internships, and community service projects in the U.S. or abroad.
- Study abroad. Be purposeful in gaining active experience beyond tourism.
- Subscribe to newsletters around campus to stay informed of many types of opportunities. We are fond of the NNN (NISO News Network). Sign up by sending an email to niso@purdue.edu with the subject "subscribe to NNN".
- Apply for many scholarships. The more applications you complete, the easier they get.
- When possible, take courses for a grade. Opting for pass/fail grades is viewed unfavorably for many scholarships.

WHEN TO BEGIN YOUR APPLICATION

FRESHMAN	SOPHOMORE	JUNIOR	SENIOR
Boren Scholarship	Astronaut Scholarship	Astronaut Scholarships	Churchill Scholarship**
Boren STEM Initiative	Boren Scholarship	Boren Scholarship	Fulbright U.S. Student Program**
