Core Competencies

Centerline supports the Utility and Oil & Natural Gas Markets in its mission to be CENTERED on an expectation of unmatched professionalism, innovation and communication by delivering a consistently positive experience for our customers, employees and the communities we serve and with the following services:

- Pipeline Construction (Steel and Poly Pipelines)
 - Transmission (High Pressure)
 - Distribution (Low Pressure)
- Integrity Management Programs (IMP)
 - Pressure Tests (hydro and nitrogen)
 - Anomaly Verification Digs
- Regulator Stations & Meter Stations
- Gathering Lines / Well Connects
- Constructability Reviews
- DOT & PHMSA Compliance Regulations
- Operator Qualifications for Gas Operations & Construction

Differentiators

Our team has a proven track record of successfully completing complex oil & natural gas projects throughout the Western United States.

- Safety Registrations: BROWZ, Veriforce, DISA, NCMS
- 2019 OSHA Safety Record: Zero Recordables / 22,790 Hrs
- Installed over 11,000 lf of 6-8" steel and poly pipeline
- Installed over 21 miles of 2" poly pipeline
- Installed over 500 natural gas services
- Focus on generating savings for our clients by identifying Value Engineering options prior to and during construction.

Company Data

Founded in 2018, Centerline is a privately held, certified woman-owned small business located in Colorado.

Specific Federal Codes:

- DUNS: 105774114
- CAGE Code: 8C4W7
- NAICS Codes:
 - 237120 – Oil & Gas Pipeline and Related Structures
 - 221210 – Natural Gas Distribution
 - 611430 – OQ Verification & Training
 - 541330 – Specialty Welding
- Certifications: WOSB, WBENC #1902120

Past Performance

The following is a list of recent customers for whom we have completed similar work. Please feel free to contact any of the individuals referenced regarding our company's capabilities.

Wyoming Natural Gas Transmission Projects: Black Hills Energy, \$1,655,000.00, over 7-months, multiple projects consisting of new regulator stations, demolition of existing facilities and replacement of steel pipeline, tanks, heater buildings, SCADA buildings and associated appurtenances. *All projects completed on-time and on-budget, with no contractor-initiated change orders.* Contact: Hillary Shirley, Transmission Utility Construction Planner, Hillary.Shirley@blackhillscorp.com, (307) 439-7103.

Wyoming Natural Gas Distribution Projects: Black Hills Energy, \$765,000.00, over 5-months, multiple projects consisting of 9,500 lf of new 6" distribution pipeline, 1,200 lf of new 8" steel pipeline, regulator station and associated appurtenances. *All projects completed on-time and on-budget, during a tight timeline and winter conditions.* Contact: Josh Robinson, Utility Construction Planner, Josh.Robinson@blackhillscorp.com, (307) 527-3975.

Gas Operations Learning Guides Assistance: Xcel Energy, \$19,000.00, over 2-months, consists of reviewing current Learning Guides for Gas Operations Apprenticeship Program and Journeyman Program. *Consultant with 35-yr experience in Gas Ops.* Contact: David Murillo, Manager of High-Pressure Gas Operations, David.Murillo@xcelenergy.com, (970) 395-1291.
