

Oriental Zodiac Chart

There are 12 animals in the Oriental Zodiac chart, which originated in China. They work in rotation, so 2007 is the year of the boar and so is 2019. You may already have learnt the animals of the Chinese zodiac. Can you spot any different animals to the ones you already know? Can you use the chart to work out the year in which you were born? What about the year your mum or dad were born, or even your grandparents?
