It is the policy of the Iowa Department of Education not to discriminate on the basis of race, creed, color, sex, sexual orientation, gender identity, national origin, gender, disability, religion, age, political party affiliation, or actual or potential parental, family or marital status in its programs, activities, or employment practices as required by the Iowa Code sections 216.9 and 256.10(2), Titles VI and VII of the Civil Rights Act of 1964 (42 U.S.C. § 2000d and 2000e), the Equal Pay Act of 1973 (29 U.S.C. § 206, *et seq.*), Title IX (Educational Amendments, 20 U.S.C. §§ 1681 – 1688), Section 504 (Rehabilitation Act of 1973, 29 U.S.C. § 794), and the Americans with Disabilities Act (42 U.S.C. § 12101, *et seq.*).

If you have questions or grievances related to compliance with this policy by the Iowa Department of Education, please contact the legal counsel for the Iowa Department of Education, Grimes State Office Building, Des Moines, IA 50319-0146, telephone number 515/281-5295, or the Director of the Office for Civil Rights, U.S. Department of Education, 111 N. Canal Street, Suite 1053, Chicago, IL 60606-7204.

Introduction

The *Statewide Voluntary Preschool Program for Four-Year-Olds* was established in 2007 Iowa House Acts, House File (HF) 877. The purpose of the program is to provide an opportunity for all young children in Iowa to enter school ready to learn by expanding voluntary access to quality preschool curriculum for all children who are four-years-old. This preliminary report reflects the first six months of implementation of the *Statewide Voluntary Preschool Program for Four-Year-Olds*.

Preschool Program Profile

Year One District Application Data. A competitive grant application process was used to award funding to support preschool programs in 64 school districts. Table 1 shows information regarding Year 1 application data. Figure 1 provides a graphic representation of awarded districts statewide (see Appendix A for a complete list of awarded districts, number of children enrolled, and funding allocated).

Table 1. Year One Preschool Program Application Data.

Application Data	Total Number
Number of districts that submitted applications	182
Number of applications read	146
Number of applications not read (did not meet submission requirements)	36
Number of districts that received awards	64

Children Enrolled. Preschool enrollment is calculated on different dates for different purposes. The first calculation was made on September 4, 2007. This number (4,444) provided by districts was used to allocate funds for the 2007-2008 school year. The second calculation was made on October 1, 2007, using the Preschool Certified Enrollment Count. This number (5,126) provided by the districts will be used to allocate funds to sustain programming for the 2008-2009 school year.

The data analyzed for the demographic representation of the four-year-old children attending the Statewide Voluntary Preschool Programs was obtained from The Basic Educational Data Survey (BEDS). This information is submitted to the Iowa Department of Education (DE) by school districts. The number is different from the Preschool Certified Enrollment since it includes additional preschoolers who are funded by other funding sources.

The race/ethnicity representation was analyzed for the same categories that are used for reporting district data for *No Child left Behind* (see Table 2). Overall, the ethnic representation of state enrollment of four-year-olds attending the preschool programs was 25 percent. The gender of four-year-olds was analyzed and 51 percent were male and 49 percent female. The average percent of districts with four-year-old enrollment that qualified for free and reduced lunch was 24 percent.

Table 2. Race/Ethnicity Representation of Preschoolers in Statewide Voluntary Preschool Programs for Four-Year-Olds.

Race/Ethnicity	Awarded Districts
Number of Caucasian Students	3,865
Percent of Caucasian Students	74.6%
Number of Asian Students	165
Percent of Asian Students	3.2%
Number of Hispanic Students	595
Percent of Hispanic Students	11.5%
Number of African American Students	533
Percent of African American Students	10.3%
Number of American Indian Students	21
Percent of American Indian of Students	.4%

Collaborative Partners. House File 877 required districts to submit a collaborative proposal that demonstrated involvement of multiple community stakeholders such as, parents, the school district, accredited nonpublic schools and faith-based representatives, the area education agency, the community empowerment area board, representatives of business, Head Start programs, Shared Visions, center-based and home-based providers of child care services, human services, public health, and economic development programs. It should be noted that not all districts had all the partners listed available to collaborate with in their communities. For example, some communities did not have a Shared Visions Preschool Program.

The application process only required school districts to identify their collaborative partners. Information was not required to be submitted regarding how programming was provided to preschoolers. (Districts may have hired teachers to provide programming in community-based settings or may have contracted with their partners to provide programming in these settings.) This information will be collected from districts in the end of year report.

Figure 2 represents the number of collaborative partners across the five categories that districts included in their application description. Categories were tallied for each district; some of the 64 districts collaborated across more than one category. (Although districts were required to partner with other preschool programs, they were not allowed to supplant funding. For example, those preschoolers supported by federal Early Childhood Special Education funds could not be duplicated in the Preschool Program for Four-Year-Olds enrollment.)

More collaborative partnerships (37 of the 64 districts) were noted for the Early Childhood Special Education programs. This was considered due to districts meeting the requirements of federal and state law to provide Early Childhood Special Education programs for preschoolers since the mid 70s. (Iowa is a Birth Mandate State which means the legislature supported providing children birth to 21 special education services as early as 1978.) Also, districts must meet federal requirements for providing Least Restrictive Environments for children with special needs learning with other typically developing children in community- based settings. Twenty-seven of the 64 districts collaborated with community-based programs; 12 of the 64 districts partnered with nonpublic schools. Districts were not required to submit data to the DE for the preschool enrollment specific to the categories described. This data component will be included in the end of year report.

Although seven districts did not include collaborative partners in the application description, these districts met other priority requirements of HF 877 of poverty, no existing preschool, or size of district for equitable statewide distribution; or the overall application plan was of high quality. In addition, some rural districts may have been limited by no available collaborative partners (no currently available Head Start or Shared Visions program in their community). Ongoing technical assistance from the DE will be provided to districts to follow-up with meeting collaboration requirements along with verification site visits in Year 2.

Note. *Category of Community Based Preschool Programs included those with Community Empowerment funding support.

Program Characteristics. Districts are required to implement program standards to ensure the provision of quality preschools. District options of program standards included: the Iowa Quality Preschool Program Standards, the National Association of Young Children Program Standards and Accreditation Criteria, or the Head Start Program Performance Standards. Figure 4 represents the percent of districts adopting one or multiple types of program standards.

Figure 4. Percent and Type of Preschool Program Standard Selected by Districts.

Source. Preliminary results (99 percent verification data completed), DE Basic Education Data Survey, 2007-2008.

In addition, districts, as well as their collaborative partners providing preschool classrooms, must meet all the quality preschool program requirements. These requirements include: providing an appropriately licensed teacher, appropriate adult child ratios and group size, appropriate materials and space, and the implementation of appropriate curriculum and assessment that aligns with the Iowa Early Learning Standards. Appropriate staff development must be provided to teachers in order to maintain the skills appropriate to their role.

Districts are required to provide 10 hours of instruction per week. Most districts reported providing an average of 12 hours per week of quality preschool services with a range from 10 to 15 hours per week.

Funding. First year allocations to awarded districts were based on a competitive grant process. Criteria and an application scoring rubric were established to reflect HF 877. As designated in HF 877 four areas of priority were established:

- districts with a high percentage of children in poverty;
- districts that did not have an existing preschool;
- districts with an established, high quality, community partnerships seeking to expand access to preschool; and
- districts of various sizes in order for there to be equitable statewide distribution of preschool program services.

Districts were awarded funds based on these priorities as well as other considerations in HF 877. Unsuccessful applications did not meet enough of the criteria or wrote a grant that was not competitive with the applicant pool. Table 3 indicates all district applications submitted to the DE and those with existing preschool programs in their community. This data represents preschool program opportunities for children that may have been established for some time in the district that have been supported by federal and/or state funding to meet needs of preschoolers with special needs (Early Childhood Special Education) and/or at-risk (Shared Visions and Head Start) (see previously described in *Collaborative Partner* section). These state and federal funded programs are not available for general education preschoolers. If the community has such quality preschool programs available, it is likely the families pay tuition or Empowerment funds cover preschool program costs.

Table 3. Total Number of District Applications Submitted and Number of Available Preschool Programs in those Districts for Target Populations (At-Risk or Children of Special Needs).

	Number of Districts	Number of Districts with Preschool Programs Available for Target Populations
Awarded districts	64	59
Districts not awarded	118	108

Source. Statewide Voluntary Preschool Program Report, 2007.

Preschool Certified Enrollment. The 64 districts reported the number of children enrolled October 1, 2007, to generate funds that will sustain their preschool program for the next school year (2008-2009). It is expected many of the districts will be working with their community partners to expand their preschool classrooms to encompass more four-year-olds. These 64 districts will not have the opportunity to re-apply for start-up grant funds.

Program Evaluation and Accountability

Awarded districts are required to submit data to the DE for the purpose of accountability and program evaluation. The Kindergarten Literacy Assessment data as well as academic progress in later years will be used to evaluate program results. Several data elements will be more easily accessed with collection and analysis of future web-based grant application plans for Year 2.

Current Department Supports

The DE has provided technical assistance and training for the Quality Preschool Program Standards (QPPS) and National Association for Educating Young Children (NAEYC) accreditation through a series of nine ICN sessions. Approximately 300 individuals attended each session. A web site was established in an effort to communicate program requirements, answer questions, and provide information about upcoming events. The various topics have included:

Program Standards Training

- Series of five ICN sessions for (QPPS)-available to any awarded district, districts who may be applying in the future, community preschools that are or will be partnering with a funded district, agencies that support preschool programs that are or may be receiving funding
- Series of four ICN sessions for NAEYC Accreditation Standards-available to Shared Visions preschools that are also Statewide Voluntary Preschool Programs for Four-Year-Olds (SVPP).

District visits

- Scheduled to visit all 64 awarded districts this school year

Quality Preschool Program Standards (QPPS) Verification

- Developing and piloting process to verify district meets QPPS (2007-2008)
- Year one districts receive verification visit (2008-2009)

Year 2 Technical Assistance

- Series of sessions to provide support in these topics
 - Collaboration
 - Assessing Community Needs
 - Requirements in Application Writing

Application Revisions

- Analyzed data from surveys sent to grant readers
- Reviewing application and grant reading process

Future Needs

The DE is striving to maintain quality preschool programs through ongoing professional development based on the Iowa Professional Development Model. Professional development funds to support preschool teachers implementing program standards aligned with curriculum and assessment will be critical to increasing quality of preschool programs. Core curriculum will be supported beginning with preschool to align with school age to impact student achievement.

The competitive grant process will be utilized to expand preschool programs to additional districts during the 2008-2009 year with approval of the state budget. A final report of the Year 1 district preschool programs will be developed and posted on the DE website: www.iowa.gov/educate/.
