

Tripwire Retail Survey 2017

In November 2017, Tripwire partnered with Dimensional Research to survey 103 IT security professionals working in retail organizations on their experiences and attitudes towards factors impacting IT security.

In light of recent high-profile data breaches, how would you characterize your company's security investments and capabilities to detect and respond to a serious cybersecurity breach?

Overall, how has your organization's ability to detect and respond to a security breach changed in the past 18 months?

Has your security budget increased as a result of recent high profile cybersecurity breaches?

How long would it take your organization to notify customers of a security breach?

How would you characterize your organization's current plan in the event of a security breach?

How prepared is your organization to notify your customers in the event of a data breach?

How would you characterize your company's capabilities for knowing where you store your customer data?

How would you characterize your company's capabilities for PROTECTING your customer data (i.e. controls are enforced, systems are secured, etc.)?

Please rank your level of security breach preparedness in each of the following areas.
