

Accelerated Math Goal-Setting Chart

When you and your students become comfortable using the Accelerated Math program, begin working toward these recommended guidelines:

- Grades 3–12 master 4 objectives per week
- Average 75% on practices and exercises (all grades)
- Grades 1–2 master 2 objectives per week
- Average 85% on regular tests (all grades)

Use the following tools to help your students set, track, and achieve their goals.

Resource Documents	Purpose
Setting Goals with Students	Refer to these tips to help you set appropriate goals for students based on their individual abilities.
Student Goal Chart	Students can use this chart to graph their weekly progress for objectives mastered.
Student Math Plan	Fill out this plan with each student to set marking period goals. Students use the document to track their own progress.

 To access resource documents, click **Resources** on the Accelerated Math home page.

Software Tools	Purpose
Set Student Goals in Software	The software tracks student progress for default or customized objectives mastered and test percent correct goals.
Create Teams in Software	Assign students to teams and view each team's progress on team reports (see below).

 To set goals in the software, click **Teams & Goals** on the Accelerated Math home page.

Reports	Purpose
Diagnostic Report	Track detailed progress of each student for objectives mastered and average percent correct.
Goal History Report	View student progress toward mastery goals for the current marking period.
Team Status Report	View team progress toward mastery goals for the current marking period.
Team Standings Chart	Print this chart weekly to display how teams compare to one another as they progress toward mastery goals.

 To access reports, click **Reports** on the Accelerated Math home page.

Interested in Renaissance Model Classroom Certification? Consistently maintain the recommended guidelines for your class as a whole for a 12-week period to qualify. For additional requirements and more information about Renaissance Certification, visit our Web site at www.renlearn.com.
