**Est ID:** Memorial Park Landscape Renovations  
**Date:** Mar-09-2021

Hi Jim,

Below are the estimated costs associated with the work that we have been talking about for Memorial Park in Whately. As requested, I have an additional line item added into the estimate for grading and seeding.

### Landscape Installation

**\$4,935.00**

New planting beds will be created (as shown on the design) throughout Memorial Park. All new planting beds will receive a 2" deep bed edge, all turf will be cut out from within and the beds will be smoothed out using loam compost. New plant material will be amended at the time of planting and the beds will be mulched with forest mix mulch (dark brown color). All debris created will be cleaned up and disposed off site.

### Loam and Seed

**\$3,286.75**

Loam will be dumped and spread throughout the work area, as shown on the design, in order smooth out the grade to help water drain away from the park (as long as the outside perimeter hard surfaces allow for this). Loam will be dumped and spread prior to adding the proposed planting beds then afterwards, the area will be harley raked smooth, seeded, fertilized and straw mulched. All debris created will be cleaned up and disposed of site. We will set up a temporary irrigation system afterwards to help keep the newly seeded area watered through germination. We will then remove the temp system prior to the first mowing.

\*\*\*All seeding is done in the fall which is the proper time of the year for the best germination.

\*\*\*I have a loam allowance included within the estimate. What we don't use from the allowance, we will not charge for. I want to make sure we have enough in order to achieve what we need to with the leveling of the lawn area.
