

## **The Project Startup and Implementation Plan Demonstration Meeting of the National Key R & D Program of China during the 13th Five-Year Plan Period held in Beijing**

On May 7th , the project startup and implementation plan demonstration meeting of the "Research and Application on the Tank Detection Robot for the National Petroleum Strategic Reserve Repository Safety" (2019YFB1310700) was held in CSEI through online meeting.

Liu Sanjiang, the president of CSEI and project leader, pointed out that the research and application on oil tanks detection robots would have a great significance for the construction of the national petroleum strategic reserve safety prevention and control system. CSEI will fully support the project implementation of the tank detection robot.

Shen Gongtian, the vice president of CSEI and project responsible person, made a detailed report on the project implementation plan, and thanked the support from the High-Tech Research and Development Center of the Ministry of Science and Technology, the State Administration for Market Regulation and experts on this project. The participated experts had discussions and inquiries, hoping that the project results could solve the problem in oil detection of the large oil tanks as soon as possible.

The High-Tech Research and Development Center of the Ministry of Science and Technology, the Technology and Finance Division of SAMR, the experts of key project group, the responsible experts of project, the experts of project committee and the leaders of undertaking unit , and the project members attended this meeting.
