

Attendance Tracker Pro (Cloud-Based)

Key Features

- Track attendees to and from events by scanning their badges.
- Verify the total time individuals attended a class or seminar.
- Access your data anytime, anywhere with our browser based program. No installation required!
- Create reports on who attended for how long and who did not attend what seminar or breakout session.

Overview

MSS Software's Attendance Tracker Pro is a cloud-based application that allows users to track attendees for attendance, security and lead retrieval using portable barcode readers. Attendance Tracker Pro will quickly give you results on almost any browser in an easy-to-read report format. The package consists of:

- Economical barcode readers that can be purchased or rented.
- A browser-based program for printing badges, tracking attendees and creating reports.

How It Works

1. First, use Attendance Tracker Pro to print barcoded badges for each attendee. The application even allows you to add additional attendees as they register.
2. Scan or manually enter the seminar session number (Each session is given a unique ID).
3. Scan the badges of each person who enters the room of that session. If you are tracking the exact time a person attended for certification purposes, you must also scan the individual leaving the session early.
4. After you've finished with this session, you can enter a new session and scan more badges, or you can transfer the information from the scanner.
5. Finally, bring up the browser-based application and allow it to pull in the data, so you can start getting your attendance reports.

Benefits

With Attendance Tracker Pro, you no longer need to use cumbersome manual methods of tracking attendees at events. Attendance tracking can be automated, saving you time and money and improving accuracy! Attendance Tracker Pro can be accessed anytime, anywhere on just about any browser, even Mac Safari. No installation is required. This application can be used for any of the following purposes:

- Seminars, conventions, training, certification and other event attendance tracking
- Exhibitor tradeshow lead collection and retrieval
- Enhanced security at events

Complete Package

The complete package, which includes the cloud-based application and one barcode reader, is available for \$2,995 (call for more pricing details.) If additional scanners are needed, they can be purchased for \$495 to \$795 each or rented from \$100 each per week.

Sample barcode reader used with Attendance Tracker Pro.

Attendance Tracker Pro is simple to use. Just enter the session number and scan the attendee's badges.
