

Table of Contents

Preface	1
Chapter One	11
<i>1. Global Guide to Tropical Cyclone Forecasting Overview</i>	11
1.1 Introduction and purpose	11
1.1.2 Tropical Cyclone Climatology (Neumann)	12
1.1.3 Tropical Cyclone Motion (Kimberlain and Brennen)	12
1.1.4 Tropical Cyclone Structure (Evans)	13
1.1.5 Storm Surge and Open Ocean Waves (Lyons)	13
1.1.6 Tropical Cyclone Hydrology (Lai et al.)	14
1.1.7 Seasonal Forecasting (Klotzbach et al.)	14
1.1.8 Forecasting Strategy (Burton et al.).....	14
1.1.9 Warning Strategy (Guard).....	15
1.1.10 Training materials (Guard).....	15
1.1.11 Ready Reckoner	15
1.2 The global tropical cyclone forecasting network	15
1.2.1 Tropical cyclone warnings	18
1.2.2 Naming of tropical cyclones	24
1.2.3 Terminology.....	25
1.3 References	27
Chapter Two	28
<i>2. A Global Tropical Cyclone Climatology</i>	28
2.1 Introduction and purpose	28
2.1.1 About historical TC data	30
2.1.2 On the quality of TC data.....	31
2.1.3 Basin boundaries	32
2.1.4 Wind averaging times	33
2.2. Chart preparation	34
2.2.1 Tropical cyclone tracks	35
2.2.3 Tropical cyclone track density	37
2.2.4 Motion parameters	38
2.2.5 TC vector direction	40
2.2.6 Vector and scalar speeds.....	41
2.2.7 Global values of the steadiness index	42
2.3 Tabular data	43

2.3.1 Seasonal summaries	43
2.3.2 Other comments on seasonal summaries	47
2.4 Meridional profiles.....	47
2.4.1 Translational motion	48
2.4.2 Meridional values of steadiness index	48
2.5 Intra-seasonal TC occurrence.....	51
2.6 Some statistical considerations.....	54
2.6.1 Binomial and Poisson distributions	54
2.6.2 Mixed distributions.....	55
2.6.2.1 TC motion (bivariate normal distribution)	55
2.6.2.2 TC wind (Weibull distribution)	55
2.6.3 Other TC related distributions.....	57
2.6.4 Additional remarks	58
2.7 References	58
Chapter Three.....	63
3. <i>Tropical Cyclone Motion</i>	63
3.1 Introduction	63
3.2 Position analysis.....	63
3.3 TC track forecasting	90
3.4 Summary and conclusions	119
3.5 Acknowledgements.....	120
3.6 References	120
Chapter Four.....	126
4. <i>Tropical Cyclone Intensity, Structure, and Structure Change</i>	126
4.1 Introduction ¹	126
4.2 Necessary ingredients for tropical cyclogenesis	127
4.3 Tropical cyclone structure needed for genesis and intensification to continue.....	128
4.4 Regional sources of disturbances that can develop into tropical cyclones	130
4.5 Mechanisms for generation of tropical disturbances	132
4.6 Favorable conditions for the evolution of a tropical disturbance into a tropical storm.....	136
4.7 Tropical cyclone intensity and mechanisms of intensity change	137
4.8 References	151
Chapter Five.....	156
5. <i>Tropical Cyclone Storm Surge and Open Ocean Waves</i>	156

5.1 Introduction	156
5.2 Wave growth.....	156
5.3 Wave spectrum.....	157
5.4 Wind fetch length	159
5.5 Wind duration.....	161
5.6 Tropical cyclone swells.....	165
5.7 Radius of 12 foot seas vs coastal wave heights	168
5.8 Coastal surf	168
5.9 Tropical cyclone wave/swell setup & run-up.....	169
5.10 Some specific forecast problems	172
5.10.1. Trapped fetch (contributed by Mr. Jeff Callaghan)	172
5.10.2 Storm surge probabilities	178
5.10.3 Summary.....	178
Chapter Six	180
<i>6. Tropical Cyclone Rainfall and Flood Forecasting</i>	180
6.1 Introduction and basic hydrology	180
6.1.1 Surface runoff.....	180
6.1.2 Interflow	181
6.1.3 Basin properties.....	181
6.1.4 Pre-event water	182
6.2 Types of flooding.....	182
6.2.1 Flash flooding	182
6.2.2 Area and inland flooding	183
6.2.3 River flooding.....	183
6.2.4 Mudslides and debris flows	184
6.3 Satellite techniques.....	186
6.3.1 Technological advances	186
6.3.2 Quantitative precipitation estimation (QPE)	188
6.3.3 Flood monitoring	191
6.4 Radar techniques	192
6.4.1 Overview.....	192
6.4.2 Radar quantitative precipitation estimates (QPE).....	193
6.4.3 Rain characteristics.....	195
6.4.4 Future development.....	195
6.5 Raingauge networks and techniques	195
6.5.1 Gauge-based statistical models	195
6.5.2 Asymmetry and topographic effects	197

6.6 Synoptic and climatological techniques.....	200
6.6.1 Climatological patterns.....	200
6.6.2 Rainfall patterns in and around the cyclone.....	201
6.6.3 Orographic effect and landfall.....	202
6.7 QPF products.....	203
6.7.1 Numerical and satellite-based products.....	203
6.7.2 Multi-model ensemble	206
6.7.3 Radar-based now casting application.....	208
6.7.4 Verification	208
6.8 Flood forecasting	209
6.8.1 Hydrological tools and models	209
6.8.2 Operational products.....	210
6.8.3 A forecast technique for diagnosing areas of extreme rainfall	211
6.8.3.1 Typhoon Bilis	211
6.8.3.2 Hurricane Mitch	214
6.8.3.3 Vietnam floods of November 1999	215
6.8.3.4 Mumbai Floods.....	216
6.8.3.5 Typhoon Chata'an disaster in the Chuuk Lagoon Islands, FSM.....	217
6.8.3.6 World record rainfall La Reunion	219
6.8.4 Some still pertinent forecast hints from the previous Global Guide	219
6.8.4.1. Quantitative prediction of tropical cyclone rainfall difficult for four reasons:	219
6.8.4.2. Rainfall analysis and forecasting	220
6.8.4.3. Determining threat areas	220
6.8.4.4. Monitoring the event	221
6.9. References	221
Chapter Seven	229
<i>7. Seasonal Forecasting of Tropical Cyclones.....</i>	229
7.1 Introduction	229
7.2 Colorado State University seasonal hurricane outlooks	233
7.3 NOAA seasonal hurricane outlooks	236
7.4 City University of Hong Kong seasonal hurricane outlooks	239
7.5 Tropical Storm Risk seasonal hurricane outlooks	241
7.6 ECMWF seasonal hurricane outlooks	246
7.7 IRI seasonal hurricane outlooks	249
7.8 Summary	256
7.9 Reference	256
Chapter Eight	261

<i>8. Operational Strategy</i>	261
8.1 Introduction	261
8.2 Infrastructure and systems	262
8.2.1 Physical design of the forecast/warning office.....	262
8.2.2 Technology and data access	264
8.3 People	267
8.3.1 Staffing.....	267
8.3.2 Training.....	268
8.3.3 Roles	269
8.4 TCWC process and procedures	270
8.4.1 A cyclical view of TCWC process.....	271
8.4.2 Documenting procedures	271
8.4.3 The critical time window	271
8.4.4 Coping with the extraordinary.....	273
8.5 Delivering the message	274
8.5.1 Forecast dissemination.....	274
8.5.2 Interaction with the media	275
8.5.3 Social media.....	276
8.5.4 Interaction with Emergency Management agencies.....	277
8.6 Outreach and public education.....	277
8.7 Continuous improvement	278
8.7.1 Immediate post impact assessment.....	278
8.7.2 Formal review/verification	279
8.7.3 Preseason readiness	280
8.8 A forecaster's operational strategy.....	281
8.8.1 Know your operational plan	281
8.8.2 Know your duties.....	282
8.8.3 Know your equipment	282
8.8.4 Try to anticipate cyclogenesis	282
8.8.5 Locate the system centre as effectively as possible	282
8.8.6 Use all available prediction techniques	282
8.8.7 Keep a log	283
8.8.8 Issue "now-time" warnings.....	283
8.8.9 Know the danger zones for possible cyclone impact	283
8.8.10 Keep your message clear	283
8.8.11 "Double check" warning information	284
8.8.12 Be responsive	284
8.9 Summary	284

8.10 References	286
Appendix	287
Appendix 8.1 TCWC forecast process time line.....	287
Appendix 8.2 Tropical Cyclone Information Processing System (TIPS) at the Hong Kong Observatory.....	288
Appendix 8.3 Some capabilities at the RSMC - Tropical Cyclone Centre New Delhi	288
References	293
Chapter Nine.....	294
<i>9. Warning Strategies</i>	<i>294</i>
9.1 Introduction	294
9.1.1 Purpose of strategies.....	294
9.1.2 Objective of an integrated national warning service.....	295
9.1.3 Forecast strategy	295
9.1.4 Warning strategy	296
9.1.5 Response strategy	296
9.1.6 Help make critical decisions more effective	296
9.2 The nature of warning and response	297
9.2.1 Principles for good major hazard warnings	297
9.2.2 Response to warnings: behavioral factors.....	298
9.2.3 Warning strategies in an interdisciplinary perspective	299
9.3 Operational strategies for tropical cyclone (TC) warning and response systems.....	300
9.3.1 Warning and response system	301
9.3.2 Warning and response phases.....	303
9.4 Constraints that challenge warning strategies.....	306
9.4.1 Forecast uncertainty.....	307
9.4.2 Strike probability forecasts.....	309
9.4.3 Expect the unusual, it is normal	310
9.4.4 Warning content and terminology	312
9.4.4.1 Forms of presentation.....	313
9.4.4.2 Communicating forecast uncertainties	315
9.4.4.3 From weather prediction to weather impacts prediction (National Research Council, 2010)	318
9.4.5 Warning dissemination.....	319
9.4.5.1 Various modes of warning dissemination	319
9.4.5.2 Warnings to the last mile	322
9.5 Hazard, vulnerability and risk assessment	324

9.5.1 Quantification of risk	325
9.5.2 Hazard or threat assessment.....	325
9.5.3 Vulnerability assessment.....	327
9.5.4 Potential disaster risk scales.....	329
9.5.5 Conveying forecast uncertainty.....	329
 9.6 Societal impacts of tropical cyclones	330
9.6.1 Introduction.....	330
9.6.2 Physical impacts of tropical cyclones on people and communities.....	331
9.6.3 Physical impacts upon households and communities.....	333
9.6.4 Psychological impacts upon households and communities	333
9.6.5 Environmental damage	334
 9.7 Vulnerability and resilience.....	334
9.8 Tropical cyclone hazard mitigation	336
9.9 Economic impacts of tropical cyclones	337
 9.9.1 Loss normalization.....	338
 9.10 Future and current loss sensitivity.....	343
9.11 Financial management of extreme events	346
9.11.1 Catastrophe insurance: how it is changing in the US	346
9.11.2 The disaster mitigation challenge.....	347
9.11.3 Global risk financing in coming decades.....	348
9.11.4 Integrating the financial management of disasters as part of a national strategy.....	349
 9.12 Acknowledgements.....	349
9.13 References	350
9.13.1 References	350
9.13.2 References	352
 Chapter Ten	356
 <i>10 Tropical Cyclone Training</i>	<i>356</i>
10.1 UCAR, COMET®, MetEd.....	356
10.1.1 COMET/MetEd: Tropical/Hurricanes	357
10.1.2 COMET/MetEd: Satellite Meteorology.....	358
10.1.3 COMET/MetEd: Radar Meteorology	358
10.1.4 COMET/MetEd: Oceanography/Marine Meteorology	358
10.1.5 COMET/MetEd: Hydrology/Flooding.....	359
10.1.6 COMET/MetEd: Emergency Management	360
10.1.7 COMET/MetEd: Numerical Modeling	360
 10.2 WMO-sponsored training	361
10.3 Regional training	361

10.3.1 National meteorological center-sponsored, RSMC-sponsored, and TCWC-sponsored training	361
10.3.2 National and regional disaster risk reduction.....	361
 10.4 Internal training programs and certifications	361
10.4.1 NOAA	361
 10.5 The function of training programs in tropical cyclone centers	362
10.5.1 Certification training.....	362
10.5.2 Recurrent training	362
10.5.3. Advanced or specialized training.....	363
 10.6 WMO Tropical Cyclone Forecaster's Website.....	363
 Chapter Eleven	364
<i>11. Ready Reckoner.....</i>	364
11.1 Introduction	364
11.2 Unit conversion	364
11.3 Beaufort scale	365
11.4 Useful tropical cyclone parameters	368
11.4.1 Tropical cyclone severity scales.....	368
11.4.2 Gust factors	368
11.4.3 Dvorak intensity relationship.....	369
11.5 Useful constants.....	370
11.6 Derived parameters	372
11.6.1 Definition of terms	372
11.6.2 Derived parameters.....	373
11.7 Tropical cyclone records	378
11.7.1 Global records	378
11.7.2 Regional Records	380
11.8 Trivia corner	380
11.9 References	382
 Glossary.....	384
Acknowledgements	397
