INTRODUCING SUBSCRIPTION MANAGEMENT SYSTEM

Subscription Management System Brochure

- ✓ Subscription Management .
- ✓ Customer Data Management
- ✓ Billing and Invoicing
- ✓ Payment Processing
- ✓ Reporting and Analytics

INTRODUCTION

Subscription management software, or recurring billing and subscription billing, stores payment data and processing charges to automatically take care of recurring revenue like customer subscriptions. Subscription management software adds on to a payment gateway's one-time payment functionality. Products in this category are offered as either a software suite or a standalone tool; suites manage the entire subscription process while standalone products include specialized add-ons that make it easy for businesses to add subscription models to their current product or service offerings.

Real-time dashboard

- Unique and powerful dashboard.
- View the number of activation by day wise i.e today,yesterday,or monthly as well as the the expired not renewed .
- The dashboard displays the recents update,latest update,recent subscriptions and sales statistics.
- The dashboard shows the trial v/s live subscriptions.
- Subscriber Analytics data shows on dashboard by package wise

Invoicing

- It create a invoice for customer subscriptions and any invoice items that had been left pending on the customer.

Subscriptions Renewal

- It provide the renewed fuctionality for subscriptions for plan subscribers.

BENEFITS

Easy access to the information

The main advantage of using the SMS is that the company will have easy access to the information of their customers, with reduced hassles. The dashboard and profile pages of your customers will give you all the personal details and detailed demographic information of all your subscribers. With the easy accessibility to information

Robust Reporting

With the best re Subscription Maangement System , you will have an instant access to real-time reports. The report provides you the key information like subscription plan/product that customer recently use ,the subscription amount along with the start on date and expiry on date.

Prioritize Work

Get notifications about the progress of each task, via email or push notification. Use the built-in drag-and-drop feature to quickly move tasks to different priorities.

A Flexible System

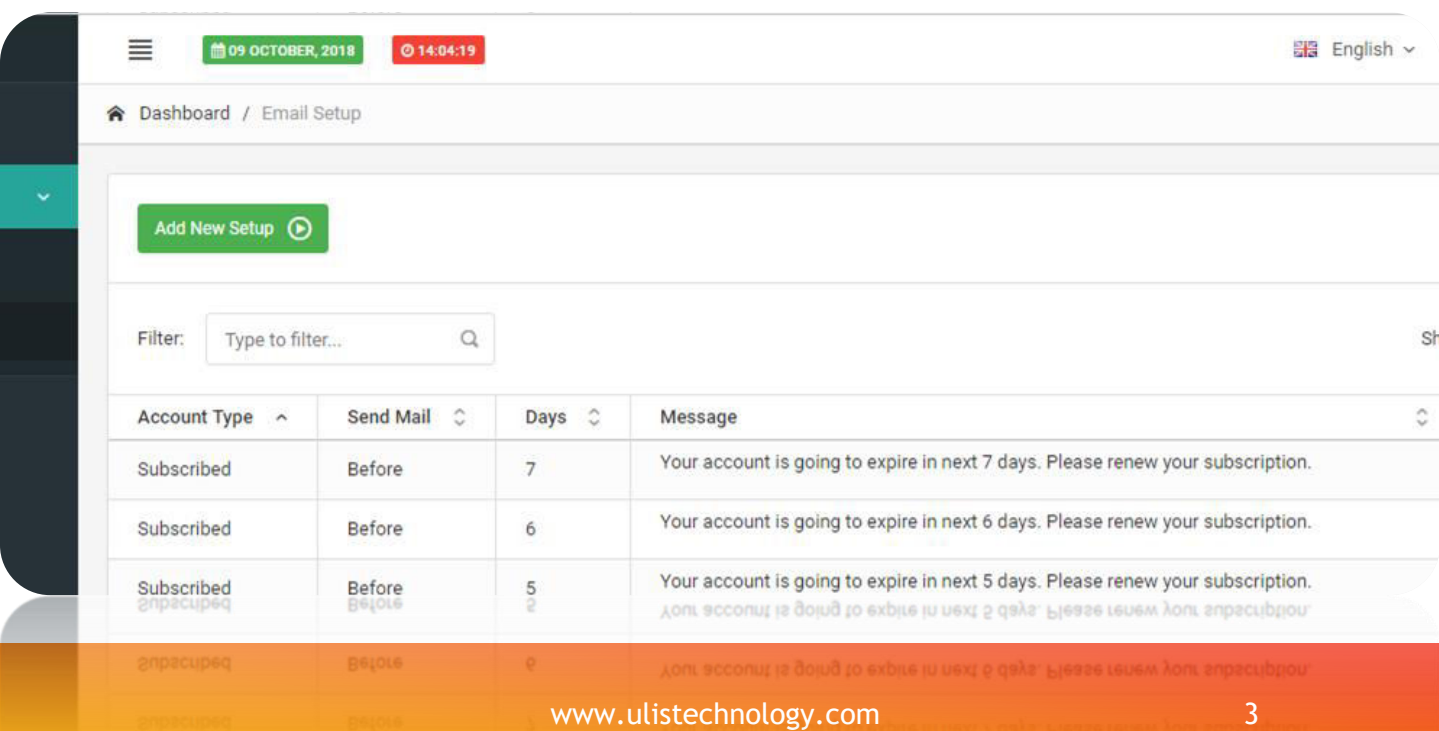

With a well-documented API, a best subscription billing software is always more flexible to offer a seamless experience to the users

Lower Cost

Using a SMS proves much cost-effective than building your own system. It saves your start-up costs and allows you to reach markets in an affordable manner. The generic payment systems often fail to provide such type of cost benefits.

Time Saving

A ready-to-go payment system saves your time in marketing your products and increasing your revenue. You can quickly put up your products for selling and can create a sustainable business model. The recurring billing software will automatically send invoices to your clients on regular basis without creating much of a hassle for you.
