**EXAMPLES OF SIGNIFICANT PERFORMANCE
TO QUALIFY FOR ELEVATION TO IEEE SENIOR MEMBER GRADE
(at least 5 years)**

Five years of significant performance:

- Team leader, task supervisor, program manager or project leader
- Performing research with some measure of success
- Developing and teaching courses with research and publications
- Substantial design, development or project responsibility, or achievement
- Recognized contributions to the welfare of technical professions
- Contributions in such areas as technical editing, patent prosecution or patent law, provided these contributions serve to advance progress substantially in IEEE designated fields
- Professional awards and licenses may be considered

Many prospective applicants make the mistake of assuming that “significant performance” requires special awards, patents or other extremely sophisticated technical accomplishments; such is not the case. Substantial job responsibilities such as team leader, task supervisor, engineer in charge of a program or project, engineer or scientist performing research with some measure of success (papers), or faculty developing and teaching courses with research and publications, all are indications of significant performance.

Ten years of professional practice: The A&A Committee evaluating your application will count the years you have been in professional practice. Your educational experience is credited toward that time as follows: 3 years for a baccalaureate degree in an IEEE-designated field; 4 years if you hold baccalaureate and masters degrees; and five years for a doctorate.
