Nerivio®

FDA Cleared, Non-pharmacologic Acute Treatment for Migraine Patients Age 12 and Over

Nerivio is an innovative remote electrical neuromodulation (REN) wearable device applied to the upper arm at the onset of migraine headaches or aura. Upon stimulation of peripheral nerves in the upper arm, Nerivio can abort or significantly relieve migraine attacks.

Clinical Trials: Acute Treatment of Migraine

Yarnitsky, et al 2019, Headache

Hershey et al, 2020, Headache

Safety in adults:

Nerivio is well tolerated. 96.4% of adult patients studied did not report any device-related side effects. The reported device-related side effects were mild, did not require treatment, and were temporal. There were no systemic side effects, no SAEs, and no discontinuations due to adverse events.

Safety in adolescents:

One mild device-related adverse event (temporary feeling of pain in arm, resolved after the treatment without requiring intervention). No device-related serious adverse events. None of the participants withdrew from the study due to device-related adverse events.

Large Size Real-World Evidence Analysis: Acute Treatment of Migraine

12,368
users analyzed
(85.1% Female)

2,514
with evaluable treatments
(86.8% Female)

Total of 121,947 treatments
(10.4% with moderate or severe pain)

Note: *2,514 patients: patients who had at least 4 evaluable treatments for the pain response analysis, i.e.: for at least 4 treatments, a patient answered the pain level question at baseline (treatment initiation) and post 2 hours (from treatment initiation).

Safety: adverse events in 59 out of 12,368 users (0.48%)

Mild -
56 users
(0.45%)

Moderate -
3
(0.03%)

Severe -
none

INDICATION FOR USE:

Nerivio® is indicated for acute treatment of migraine with or without aura in patients 12 years of age or older. Nerivio is a prescription use, self-administered device for use in the home environment at the onset of migraine headache or aura.

IMPORTANT SAFETY INFORMATION:

Nerivio® should not be used by people with congestive heart failure, severe cardiac or cerebrovascular disease, or uncontrolled epilepsy. Nerivio® should not be used by anyone with active implantable medical devices (eg, pacemaker, hearing aid implant). It should only be applied on the upper arm over dry, healthy skin with normal physical sensation and without any metallic implants or in proximity to cancerous lesions. Nerivio has not been evaluated in pregnancy or those under the age of 12. For full use instructions and safety information, please see the Nerivio® QuickStart Guide.
