

TOKEN BOARD

The student will choose something that he/she is working for and place it in the large square. The teacher or therapist will place a token in each small square once the required activity is completed, once all of the small squares are filled the student will get their reinforcer. Please cut on the solid lines. Next, laminate each token board. Find a reward the student wants and place it in the box next to the phrase "I am working for>" Now make small tokens that fit in the small boxes.

I am working for
