Document Title, Number, and Year:

1. Was a written procedure used to govern the creation of this standard?

Yes No (If yes, describe below.)

2. Did an established organization organize the development of this document?

Yes No (If yes, describe the organization or organizations.)

3. Was a process used to seek participants from diverse interest categories with the objective of achieving balance?

Yes No (If yes, describe the process and list the diverse categories.)

4. Was the document open for comment to anyone who is directly or materially affected by the content of the standard?
Yes No (If yes, describe how the notification of availability for comment was conducted.)
5. Was voting conditional on membership or technical qualifications/requirements? Yes No
6. Were there any discriminatory financial barriers to participation in the vote? Yes No (If yes, describe below.)
7. In the development of the document did any single interest, individual or organization dominate (e.g. members of a single group accounting for more than half of the participants)? Yes No (If yes, describe below.)
8. Was there a mechanism to ensure that all comments are addressed or maintained? Yes No
(If yes, describe how comments and concerns were documented and adjudicated. Please provide supporting documentation as attachments.)

9. Was a process used for the impartial handling of disputes regarding technical or procedural issues?
Yes No (If yes, describe below.)

10. Was the document developed or revised in the last 5 years? Yes No (If yes, describe below.)

11. Does a process exist for formal revisions of this document? Yes No (If yes, describe below.)

Please use this box if you need extra space for a response. Please include the question number(s) with the continuation of your response.
